G.O. No. 2722	Press Mis.
31.32 Dated 22-11-1859.	

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
for the month of November 1859.*

No. 31. Read the following Proceedings of the Madras Government in the Military Department, dated 11th November 1859, No. 3986.

Ordering that the rotatory pump at the Artillery barracks wash-house in the fort be taken down and replaced by a common hand pump, and sanctioning the employment of three lascars to work it. } (Vide Military Proceedings from 11th to 20th November 1859, Nos. 34 @ 37.)

No. 32. ORDER THEREON, 22nd November 1859, No. 2722.

Ordered that the foregoing proceedings be recorded.

(Signed) J. D. BOURDILLON,
Secretary to Government.

3

MILITARY DEPARTMENT.
PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following papers :—

From the Chief Engineer, Fort Saint George, 15th October 1859, No. 6170 ; to the Secretary to Government, Public Works Department.

I have the honor to forward herewith, a letter received from the Acting Garrison Engineer in which he brings to notice that the Rotatory Pump erected at the Artillery Barracks Wash House in the Fort seems unsuited to the work, requiring more power than can be given to it by manual labor ; also

Enclosures 2.

Letter from Acting Garrison Engineer dated 1st October 1859, No. 488 with its enclosure.

that the quantity of water to be lifted is too small to make it worth while to use a Steam Engine, as contemplated by the Barrack Master in his official Memo. accompanying Captain Rawlins' letter.

2. The Pump in question was provided for in a Supplemental Estimate received from the Garrison Engineer for works at the Artillery Shower Baths, which were approved of by Government in Extract Minutes of Consultation dated 23rd January 1857, No. 219.

3. I beg therefore to recommend that, as proposed by the Acting Garrison Engineer, the Pump be taken down and replaced, at a cost of Rupees 450, four hundred and fifty, by a common hand Pump, which it is expected will do all the work required. The working of the hand Pump will cost about Rupees 21, twenty one, per month.

Memorandum from the Chief Engineer, Fort Saint George, 1st November 1859, No. 6758 ; to the Acting Deputy Secretary to Government, Military Department.

With reference to the Memo.* from the Acting Deputy Secretary to Government, Military Department, the Chief Engineer has the honor to state that as the Cistern to be filled by the hand Pump is raised about 20 feet above the level of the water in the

• *Dated 27th October 1859.*

Well and is required to supply water for the men, women, and children belonging to the Detachment of Artillery in the Fort entailing the necessity therefore of its being filled probably 2 or 3 times during the 24 hours, it would hardly be fair to impose the work on the men of the Artillery when their fellow Soldiers of Her Majesty's 44th have their water supplied by Puckallies at the expense of Government. It is proposed therefore to employ 3 Lascars at 7 Rupees each per mensem to be provided by the Commissariat Department in lieu of a similar number of Puckallies at present employed for supplying water to the Artillery Barracks.

ORDER, No. 3986, 11th November 1859.

The Governor in Council approves of the measure proposed in para. 3 of the foregoing letter, and sanctions the employment of three Lascars to work the Pump.

(True Extract.)

M. M. S. S.
Ag. Dy. Secretary to Government.
