Public Works DEPARTMENT.

CO. No.	550	Page	ME
Dated	28-6-38		

Not to be folded or roughly handled

Fort Saint George, Public Works Consultation of 15th March 1859.

No. 131. Read the following letter from Colonel C. E. FABER, Chief Engineer; to J. D. BOURDILLON, Esq., Secretary to Government, dated 12th March 1859, No. 8546.

SIR,

I have the honor to submit for the sanction of the Right Honorable the Governor in Council, an Estimate received from the Special Executive Engineer at Jackatalla, amounting to Rupees (776) seven hundred and seventy-six, for cutting a water supply channel from the Eravangad Stream to the New Bazar at Jackatalla.

2. Another letter from the Commissary General urging the necessity of the work, is herewith forwarded, and as I am of the same opinion as that Officer, I recommend Government to sanction the Estimate for Rupees (776) seven hundred seventy-six, the work having already been put in hand I hope.

Letter from Colonel A. McCALLY, Commissary General; to Colonel C. E. FABER, Chief Engineer, dated 9th February 1859, No. 5074.

SIR,

I have the honor to annex copy of a letter from the Officer in charge of the Commissariat at Jackatalla, representing the necessity of a greater supply of water being brought through the Bazars.

2. The probable expense is Estimated at Rupees 1,500, and as the necessity will be still more increased when the 60th Rifles, under orders for that station arrive there, I request you will be good enough to give the subject your early consideration.

Letter from Captain L. A. BRYDON, in charge Commissariat Department and Acting Superintendent of Police; to the Commissary General of the Army, dated Jackatalla, 29th January 1859, No. 99.

SIR,

Now that there is every prospect of a European Regiment coming to this Station, by reason of which there will be a great increase to the inhabitants of the Bazar, I have the honor to point out the absolute necessity of a greater supply of Water being brought through the Bazar not only for building, but also for domestic purposes.

2. I have examined the ground over which the Water will have to be brought, it is at a distance of about one mile and a half from the Bazar, and the expense of cutting a water-course would probably amount to about fifteen hundred Rupees.

Letter from Captain J. CAMPBELL, Special Executive Engineer, Jackatalla; to Colonel C. E. FABER, Chief Engineer, dated Jackatalla, 26th February 1859, No. 292.

SIR,

In reply to your letter, No. and date as per margin, calling for early report on proposed water Channel for new Military Bazars, I have the honor to state from personal inspection, that the probable cost of this decidedly necessary supply will as per accompanying Estimate, not in my opinion exceed Rupees (776,) seven hundred and seventy-six. The work requires immediate sanction and execution, though I beg you to bear in mind that this and similar emergent demands on my small amount of available labor cannot be met without interfering with my regular prosecution of current work. A Telegraphic sanction to commence the Channel will always save 4 days time.

Fort Saint George, Public Works Consultation of 15th March 1859.

No. 132.

ORDER THEREON, No. 594; dated 15th March 1859.

The Right Honorable the Governor in Council sanctions on emergency, the estimate amounting to Rupees (776) seven hundred and seventy-six, submitted with the above letter, for cutting a water Channel from the Eravangad Stream to the new Bazar at Jackatalla.

(Signed) J. D. BOURDILLON,
Secretary to Government.
