letter of the 15th January last No. 2072, was mislaid by Major Birdwood himself, the then Superintending Engineer of the Central Circle, which necessitated application being made for a 2nd copy. In forwarding this Mr. Dopping omitted to send an important enclosure, which caused the subsequent correspondence. As Mr. Dopping has generally sent up original Papers, it was supposed that

the omission in the present instance was owing to his not having retained any copy. Consequently, the order dated the 10th February 1859 No. 7763, was passed. It will be observed that the Acting District Engineer has not up to this time been able to supply this Office with a copy of the proper enclosure, the one forwarded bearing No. 693, dated 4th and corrected to 13th January, not answering the description given of it in para. 1 of his letter of the 15th Idem, above referred to.

4. The system of supplying original papers from one office to another, however convenient and practicable at the Presidency, I am of opinion will not be found to answer with regard to the District Offices, and if originals are sent up by the District Engineers, I would request that copies should be retained for reference and record in their own offices.

5. By the accompanying papers it will be seen that the use of the word "Trunks" (taken exception to in para. 4,) is borne out by the Garrison Engineers wording of his own Estimate, and is, I find, the designation used by his Department to represent the main body or "Trunk" of the water spouts of the Barracks.

No. 37. ORDER THEREON, No. 831; dated 8th April 1859.

Ordered to be recorded, and the enclosures to be returned to the Chief Engineer.

(Signed) J. D. BOURDILLON,
Secretary to Government.
