MARINE DEPARTMENT.

PROCEEDINGS of the MADRAS GOVERNMENT.

Read, the following letter from Lieutenant Colonel J. H. BELL, Chief Engineer; to the Secretary to Government, Department Public Works, Fort Saint George, dated 11th January 1860, No. 9025.

No. 2491 dated 22nd October 1859.

Enclosures 2.

- 1 Original letter from the District Engineer, Tinnivelly, as below.
- 1 Abstract Estimate.

* No. 118, dated 30th November 1859.

With reference to the Proceedings of the Madras Government marginally noted, sanctioning sums for erecting Boundary Pillars for certain ports in the Madras Presidency, I have the honor to inform you that the District Engineer of Tinnivelly has reported* that Brick in Chunam work for which the item of 44 Rupees for erecting Pillars at Tuticorin provides, is not suited to that port on account of the distance the material has to be brought and the great cost incurred thereby on account of carriage, bandy men refusing to work unless very high rates are given, in consequence of the heavy sandy nature of the roads near the coast.

2. The material in use at Tuticorin for buildings is sand-stone or coral, the former is better adapted for Pillars and owing to the high rates paid for all kind of work by the merchants residing there cannot be executed under 4 Rupees per cubic yard.

3. I have the honor therefore to solicit the sanction of Government for the accompanying estimate, amounting to Rupees 104 or Rupees 60 in excess of the sum sanctioned in the Proceedings of the Madras Government noted above.

Referred to the Marine Department.

(Signed) C. G. MASTER,

Deputy Secretary to Government.

13th January 1860.

ORDER THEREON, 20th January 1860, No. 36.

Government sanction a further sum of (60) sixty Rupees for building the Boundary Pillars for the port of Tuticorin of Sand-stone instead of Brick, according to the estimate now submitted.
