*Proceedings of the Madras Government, Public Works Department,
for the month of January 1860.*

No. 41. Read the following letter from Lieutenant-Colonel J. H. BELL, Chief Engineer ;
to J. D. BOURDILLON, Esq., Secretary to Government, dated 7th December
1859, No. 8044.

I have the honor to forward herewith an estimate amount-
ing to Rupees 566, for constructing a stone calingulah at the
north end of the Palvoi tank in the Durmaverum taluq of
the Ballari district, and for raising the present calingulah one
foot and the bund of the tank in proportion where required.

1 Letter from District Engineer, dated
19th September 1859, No. 212, with
3 enclosures, and 1 Abstract esti-
mate.

2. The total cultivable ayacut under the above tank is 146 acres, assessed at Rupees 412,
and the average of the past 5 years, Rupees 296. The revenue derived from this tank is said
to have fallen off considerably owing to its imperfect means of retaining the supply of water it
receives, a defect which the proposed works to the tank will be the means of remedying. The
expected increase of cultivation which these works will ensure is 33 acres, which will yield
Rupees 92.

3. The estimate has been duly examined and found to be moderate but sufficient. I
beg to recommend the entry of the work in the budget of 1860-61.

No. 42. ORDER THEREON, 4th January 1860, No. 21.

The Government sanction the estimate of Rupees (566) five hundred and sixty-six for im-
provements to the Palvoi tank in the district of Ballari.

2. The amount will be disbursed out of the fund allowed for repairs.

(Signed) J. D. BOURDILLON,
Secretary to Government.

Colingulak

5. I have the honor to forward here
with an Estimate amounting to Rupees 566 for
constructing a stone Colingulak at the north end
of the Palvi Park in the Dummarum Paliy
of the Bellary District, and for raising the present
Colingulak 1 foot and the land of the Park in
proportion where required.

2. The total adjacent cultivation under
the above Park is 146 acres assessed at Rupees
412 and the average of the past 5 years, Rupees
296. The revenue derived from this Park is said
to have fallen off considerably owing to its im-
perfect means of retaining the supply of water it
receives

receives, a defect which the proposed works to the
Tank will be the means of remedying. The expected
increase of cultivation which these works will
ensure is 38 Acres which will yield Rupees 72.

3 On Estimate has been duly
examined and found to be moderate but insufficient
I beg to recommend the entry of the work in the
Budget of 1863/64.
