*Proceedings of the Madras Government, Public Works Department,
for the month of January 1860.*

No. 115. Read the following letter from Lieutenant-Colonel J. H. BELL, Chief Engineer,
to the Secretary to Government, dated 12th January 1860, No. 9090.

I have the honor to submit the accompanying letter from Lieutenant-Colonel Lawford,
Deputy Chief Engineer, Centre Circle, on duty in the Nellur district,
January 7th 1860. recommending the construction of a head sluice to the supplying chan-
nel of the Nellur tank.

2. This work estimated at Rupees 3,965, was recommended to Government in Colonel
Faber's letter of the 6th of December 1856, but postponed under the
No. 8662. order of the 4th of March 1857, paragraph 2. The necessity for the
No. 414. work has since been very strongly felt; and Colonel Lawford, concurring
after inspection of the tank and channel, in the views of the District Engineer, has directed that
in No. 5046. officer to prepare materials for the sluice, and also for a kalingal in-
cluded in the estimate of Rupees 11,000, submitted to Government on
the 15th of September 1859.

3. I have proved of these measures, and I now request the confirmation of them by
Government; for there can be no doubt that the tank is greatly endangered by the uncontrolled
supply which it receives in high and prolonged freshes of the Pennair. The channel banks are
also breached, the lands damaged, and heavy expenses for repair rendered necessary by the want
of a sluice.

4. I have requested the District Engineer to submit a revised estimate, which it is pro-
posed to execute from the repair fund of the current year.

5. The estimate for the tank revetment is under execution, agreeably to the order of the
No. 2340. 30th of September 1859. I fully concur in the necessity of this work.

No. 116. ORDER THEREON, 27th January 1860, No. 213.

The proceedings of the Chief Engineer as reported in this letter, are approved.

(Signed) T. PYCROFT,

Chief Secretary.

Public.

See.

I have the honor to submit the
Summary of 1881. accompanying letter from Lieut Colonel Sanford,
Enclosure 1881 and Deputy Chief Engineer, Kachin District,
letter dated 10th Nov 1881, recommending
the construction of a Weir Sluice to the supply
ing channel of the Kachin Lake.

This work estimated at Rs 2465.
3465. was recommended to Government in
Colonel Fraser's letter of the 6th of December 1880
but postponed under the Order of the 1st of March
1881, para 2. The necessity for the work has
since been very strongly felt, and Lieut Colonel Sanford
concurring after inspection of the tank and
channel, in the views of the District Engineer
has directed that Office to purchase materials
for the sluice, and also for a culvert
included.

S 8662

S 214

included in the Estimate of \$10,000, and
with the same work on the 30th of September 1859.
1859.

2. I have approved of these measures,
and I am sure of the confirmation of them
by your committee. You can see no doubt that
the Lake is greatly endangered by the narrow
banks, which it has raised high and
prolonged shores of the Peninsula. The current
is also broken, the banks damaged, and
heavy expenses for repairs will be necessary
by the want of a sluice.

3. I have requested the District
Engineer to submit a revised Estimate,
which it is proposed to execute from the
Repair Fund of this current year.

4. The Estimate for the Lake re-
pairment is under execution agreeably to the Order
of the 30th of September 1859. I fully concur in the
necessity of this work. \$2000

Central Office
