Doors and Windows of Family Quarters requires general renewing — the constant repairing that takes place now is most expensive in the long run, and is any thing but satisfactory, these front doors are divided across the centre and the upper portion forming a window whilst the lower portion are Venetian and were evidently from the first of a great deal too light and flimsy a description."

Department in the Madras and Bombay Presidencies will be authorized to supply as fixtures the kit or barrack boxes (without tills) required for the ammunition of each company, and to arrange for their being bolted or screwed according to the nature of the floor.

3. The G.O.C.C. directs that, in the case of Native troops, each kit box shall be packed with four smaller boxes, each to contain the ammunition of a section. It is doubtful, however, whether four boxes of sufficient capacity to hold the ammunition of a section could be fitted into a kit box. If this should be found impracticable, the Government of India have no objection to two kit boxes being supplied per company or troop.

4. The section boxes may be made up regimentally as proposed by His Excellency, the cost being recovered on contingent bills from the Military Account Department.

5. With reference to the letter from the Quarter Master General in India, No. 4986-B, dated the 3rd October 1887, the necessary orders will be issued for the issue, by the Ordnance Department, of the locks and keys, and duplicate keys, required for these ammunition boxes.

Read—the following letter from Lieutenant-Colonel G. M. J. MOORE, President, Municipal Commission, Madras, to the Chief Secretary to Government, dated Madras, 22nd June 1887, P.W. No. 335 :—

With reference to G.O., Mis. No. 959 L., dated 30th May 1887, I have the honor to state that I am not in a position to undertake the execution of the proposed improvements to the Elephant Gate bridge.

2. A work of this magnitude and importance would require an efficient officer with much experience to be always on the work. The Engineer Vice-President has not the time to devote to it, nor is there the necessary staff available.

3. Under these circumstances, I would venture to suggest that the work be executed by the Public Works Department.

Order—dated 22nd October 1887, No. 1090 M., Local and Municipal.

The Public Works Department will be requested to arrange for the work being commenced directly after the monsoon. A grant will be made of such funds as can be spent this year, and the balance provided next year.
