*Proceedings of the Madras Government, Public Works Department,
for the month of March 1860.*

No. 105. Read the following letter from Lieutenant-Colonel J. H. BELL, Chief Engineer, to the Secretary to Government, dated 21st January 1860, No. 9427.

I have the honor to report for the information of Government, that range establishments have been organized in the districts of the Madras Presidency under the sanction conceded in their Order No. 1801, dated the 26th July last, but with certain alterations in the classification of certain ranges and establishments, which I have found reason to allow.

1 Statement.

2. The difficulties on the part of District Engineers in carrying out the arrangement as sanctioned have given rise to much correspondence. The classification of some of the ranges was objected to as well as the transfer of officers and subordinates from their present charges to others, in order to make their respective ranks correspond with the classes of their respective charge. The reasons alleged may be briefly enumerated as follows :—

3. With regard to the classification, the District Engineers noted in the margin, and others objected to the class assigned to some of the ranges, and they considered that in classing them due consideration was not given to the peculiarities of the works and the importance of each charge. This office was guided in the classification by their relative importance in point of revenue, but District Engineers are of opinion that some of the 1st and 2nd class ranges do not require more than ordinary attention, while others, lower classed, are in a stage of progressive improvement, and require officers of great skill and experience to manage them, and to design and carry out the work intended for the development of the resources of those parts of the country.

Godavery.	Bellary.
Krishna.	Chingleput.
Nellore.	Tanjore.
Cuddapah.	Canara.

4. As to the transfer of officers and subordinates from one range to another to meet the classification, the District Engineers have offered considerable objection. They urged that executive officers and agents were well acquainted with the features of the country and other local peculiarities of their present charge, and that to remove them would be to deprive those parts of the country of their long-acquired local knowledge and experience, while it would take some time for others who might be placed in charge of them, by the new arrangement, to acquire that perfect knowledge of every part of their new charge so as to enable them to be of equal use and to as efficiently supervise the works and expenditure of the lower subordinates. They therefore, considered that the public service would be rather prejudiced than benefited by any change, and recommended that the officers and subordinates should remain as they were. But they urged in the mean time, in case the officers were permitted to remain in their present charge, the anomaly which must arise from allowing to subordinates who happen to be in higher classed ranges which require, however, not more than ordinary attention, better paid establishments than to officers who had charge of lower classed ones, and who had hitherto attached to them well paid establishments as their personal staff.

5. Having given due consideration to these and other arguments urged by District Engineers, I have in every case wherein I found the reason advanced to be sufficient, or where the interest of the public service required it, authorized an alteration in the classes of the ranges and establishments, as is shown in the accompanying statement of range establishments.

Resub.

6. The alterations so authorized do not involve any extra expense to the State, and may be enumerated as follows:—

Districts.	Number and designation of ranges.	Class of ranges and establishment sanctioned.	Alteration authorized.
Godavery District.....	No. 1 Lingamparti range	1st class. 120 0	0 2nd class. 100 0 0
	No. 3 Amlapūr.... do.	2nd do. 100 0	0 1st do. 120 0 0
	No. 7 Rajahmundry do.	3rd do. 75 0	0 4th do. 60 0 0
	No. 4 Nagaram aqueduct do.....	4th do. 60 0	0 3rd do. 75 0 0
Krishna District.....	No. 3 Guntur range.....	1st do. 120 0	0 3rd do. 75 0 0
	No. 7 Bandar.... do.	2nd do. 100 0	0 1st do. 120 0 0
	No. 1 Mangalagiri do.	3rd do. 75 0	0 2nd do. 100 0 0
Nellore District.....	No. 2 Kōta..... do.	1st do. 120 0	0 2nd do. 100 0 0
	No. 1 Nellore do.	2nd do. 100 0	0 1st do. 120 0 0
Cuddapah District....	No. 1 Badvel do.	2nd do. 100 0	0 3rd do. 75 0 0
	No. 4 Madanapalli... do.	3rd do. 75 0	0 2nd do. 100 0 0
Bellary District.....	No. 2 Harpanhalli do.	1st class. 120 0	0 2nd class. 100 0 0
	No. 1 Bellary..... do.	2nd do. 100 0	0 1st do. 120 0 0
Kurnool District.....	No. 3 Nandial..... do.	2nd do. 100 0	0 3rd do. 75 0 0
	No. 2 Pāniem..... do.	3rd do. 75 0	0 4th do. 60 0 0
	No. 4 Kambam..... do.	4th do. 60 0	0 2nd do. 100 0 0
	No. 5 Mannārgudi do.	1st do. 120 0	0 2nd do. 100 0 0
Tanjore District.....	No. 1 Tiruvādi..... do.	2nd do. 100 0	0 1st do. 120 0 0
	No. 5 Kandapūr... do.	2nd do. 100 0	0 4th do. 60 0 0
North Canara Dist....	No. 3 Sundā..... do.	3rd do. 75 0	0 2nd do. 100 0 0
	No. 7 Putūr..... do.	4th do. 60 0	0 3rd do. 75 0 0

7. Besides these alterations, Government have sanctioned in their order dated the 7th November last, No. 2609, alterations in the classes of two ranges, one in the district of Chingleput from a second to a first class, and the other in the North Canara district from a third to a second class, involving an additional expense of Rupees 45.

8. The District Engineers noted in the margin, have advocated the necessity of clubbing tow ranges together and placing them under one officer, under the supposition that upper subordinates would not be so well qualified for such independent charges. The District Engineer of Krishna in particular, strongly urged the union of the two delta ranges, the Ponnūr and Mangalagiri, into one, to admit of their being placed under the supervision of one officer with the view to prevent any undue distribution of the waters which might happen if they were placed under different charge. The reasons urged in these cases, however, did not appear to be conclusive, and I have disallowed the arrangement, and each range has accordingly been placed in charge of an officer or an upper subordinate, as is shown in the accompanying statement of range establishments.

9. Some of the ranges in Cuddapah, Trichinopoly and Madura were represented to require alteration in their configuration, as there were some parts to which officers in charge of the range could not proceed for inspection without much inconvenience. The Sidhaut taluq in Cuddapah of the Pulivendla range is, it appears, intersected by a range of hills, and that to inspect the works in one part of it the officer in charge must go round through Badvel in another range. The District Engineer, therefore, recommended the transfer of the taluqs of Kamlāpūr, Chennūr and Sidhaut of the Pulivendla range, to Badvel, and Duvūr and Jammalāmadugu of the latter range to Pulivendla. In Trichinopoly the four ranges originally sanctioned by Government were altered to three, under the approval of the late Chief Engineer, in January last,

on account of the intersection by the river Cauvery of one of the ranges, which rendered it difficult for the officer in charge to supervise the works which lay on the other side of it. The District Engineer desired to keep to that arrangement instead of reverting to the organization of the four ranges as originally sanctioned. As I did not consider that any transfer of taluqs from one range to another or a reduction in the number of ranges ought to be made until the configuration of the new taluqs was decided on, I requested the District Engineer to organize the ranges as originally sanctioned, but as it appeared from a subsequent representation of the District Engineer that to do so it would require an exchange of accounts, &c. which would again have to be altered when the new taluqs were constituted, I thought proper to allow the existing arrangement to stand, and authorized the entertainment of the sanctioned establishment as a temporary measure till the question of the boundaries of the new taluqs should be decided.

10. The District Engineer of Madura recommended that the Nellakōta taluq, comprised in range No. 3, might be divided between ranges Nos. 1, 2 and 3, and as the grounds of this recommendation, he explained that the Public Works on the southern and western borders of this taluq are separated from each other and from the northern side in which the 3rd circle lies, by the Nellakōta and Hunnivādi zamindāris which occupy the centre, that the southern portion adjoins the 1st range, and the western the 2nd, that it was hitherto necessary for the executive officer in charge of the 3rd range to detach and place a Sub-Overseer to superintend the works in those portions, while there were two Sub-Overseers in the 1st and 2nd ranges only a few miles from those works, and that the executive officer had to go about 18 miles to inspect the works in those detached portions, and on account of the Palani and Sirumalle hills, skirting the southern and western parts of this taluq, to return by the same road before he could continue his tour to the other parts of his range. Under this explanation, I approved of this sub-division of the taluq, but as I was of opinion that no alteration should be made in this case as well as in that of Cuddapah, until the boundaries of the new taluqs were determined, I informed those District Engineers that no alterations of the existing arrangements could be permitted before the sanction of Government was obtained.

11. These alterations and any other which may be rendered necessary by the configuration of the new taluqs, will be ascertained and made the subject of separate representation to Government.

12. The District Engineer of Chingleput recommends an alteration in the designation of range No. 3 or "Chingleput" range. He states that the greater part of the Chingleput taluq lies in the Pūnamalli range, and he, therefore, recommends that that range may be designated as the Karunguli instead of the Chingleput range. To this there appears to be no objection.

13. I beg to state with reference to my letter dated the 6th December last, No. 8034, that the officers and subordinates nominated by Captain Walker for the charge of ranges in Canara, have been approved.

14. I have the honor to request the approval of Government to my proceedings in the organization of the ranges, and their confirmation of the alterations approved of by me in the classes of ranges and establishments.

No. 106. ORDER THEREON, 8th March 1860, No. 499.

The Government sanction the alteration in the classes of the ranges and establishments specified in paragraph 6 of this letter, on the understanding that they involve no increase of charge; they request, moreover, to be furnished with a statement showing at one view, in a clear and concise form, the actual financial result of the arrangements respecting establishments, proposed by the Chief Engineer both on the present and previous occasions, in regard to the entire Department of Public Works.

2. As to the other parts of the Chief Engineer's letter, the Government will await the receipt of the further report promised in paragraph 11.

3. The change in designation referred to in paragraph 12 is sanctioned.

4. The Government approve entirely of Colonel Bell's proceedings as regards the alterations which he has considered necessary.

(Signed) J. D. BOURDILLON,
Secretary to Government.

From
The Chief Engineer
To
The Secretary to Government
Public Works Department

Sir
I have the honor to report for the information of government that Range Establishments have been organized in the Districts of the Madras Presidency under the sanction, conceded in their order D.O. 1801, dated the 26. July last, but with certain alterations in the classification of certain Ranges and Establishment which I have found reason to allow.

The difficulties on the part of District Engineers in carrying out the arrangements as sanctioned have given rise to much correspondence. The classification of some of the Ranges was objected to as well as the transfer of Officers and subordinates from their present charges to others, in order to make their respective ranks correspond with the classes of their respective charge

Enclosure 1
Sentiment:

charge. The reasons alleged may be briefly enumerated as follows.

3. With regard to the classification the District Engineers noted in the Margin and others objected to the class assigned to some of the Ranges, and they considered that in classifying them due consideration was not given to the peculiarities of the work and the importance of each charge. The Office was guided in the classification by their relative importance in point of Revenue; but District Engineers are of opinion that some of the 1st and 2nd class Ranges do not require more than ordinary attention, while others lower classed are in a stage of progressive improvement and require Officers of great skill and experience to manage them; and to design and carry out the work intended for the development of the resources of those parts of the Country.

4. As to the transfer of Officers and subordinates from one Range to another to meet the classification the District Engineers have offered considerable objection. They urged that Executive Officers and agents

were

Jaipur,
Kistna
Mellor
Rancha
Bilaspur
Chungab
Sangre
Bahara

130²
were well acquainted with the features of the Country and other local peculiarities of their present charge, and that to remove them would be to deprive those parts of the Country of their long acquired local knowledge and experience, while it would take sometime for others who might be placed in charge of them by the new arrangement to acquire that perfect knowledge of every part of their new charge, so as to enable them to be of equal use and to as efficiently supervise the works and expenditure of the lower subordinates. They therefore considered that the Public service would be rather prejudiced than benefitted by any change and recommended that the Officers and subordinates should remain as they were. But they urged in the meantime, in case the Officers were permitted to remain in their present charge, the anomaly which must arise from allowing to subordinates who happen to be in higher classed ranges which require however not more than ordinary attention, better paid establishments than to Officers who had charge of lower classed ones, and who had hitherto attached

5 Having given due consideration
to these and other arguments urged by
District Engineers, I have in every case
wherein I found the reason advanced to
be sufficient, or where the interest of the
Public Service required it, authorized an
alteration in the classes of the Ranges and
Establishments, as is shown in the ac-
companying statement of Range Estab-
lishments.

[illegible]

Besides these alterations Government
 have sanctioned in their order dated the
 7th November last alteration in the classes
 of two Ranges, one in the District of Chingle
 put from a second to a first class, and
 the other in the North Canara District
 from a third to a second class, involving
 an additional expense of Rupees 45.

The District Engineers noted
 in the Margin have advocated the necessity
 of clubbing two Ranges together and
 placing them under one Officer, under
 the supposition that better Subordinates
 would not be found to be so well qualified
 for such independent charges. The

District

Result

District Engineer of Kistna in particular strongly urged the union of the two Delta Ranges, the Ponir and Munglagheri into one to admit of their being placed under the supervision of one Officer with the view to prevent any undue distribution of the waters which might happen if they were placed under different charge. The reasons urged in these cases however did not appear to be conclusive, and I have disallowed the arrangement, and each Range has accordingly been placed in charge of an Officer or an Upper Subordinate as is shown in the accompanying statement of Range Establishments.

Some of the Ranges in Kadapa, Trichinopoly and Madura were represented to require alteration in their configuration, as there were some parts to which Officers in charge of the range could not proceed for inspection without much inconvenience.

The Sidhant Talug in Kadapa of the Puli Sidhant vendla Range is, it appears, intersected by a range of hills, and that to inspect the works in one part of it the Officer in charge must go round the Bidwai in another range. The District Engineer therefore recommended

Kamla
Lennir
Bluer
Gummalama
dug

179
recommended the transfer of the Talug of Pannalapur, Chennor and Sidhant of the Pulivendla range to Bidwai, and Ponir and Gummalundgi of the latter Range to Pulivendla. In Trichinopoly the four Ranges originally sanctioned by Government were altered to three; under the approval of the late Chief Engineer in January last, on account of the interference by the River Cauvery of one of the Ranges which rendered it difficult with the Officer in charge to supervise the works which lay on the other side of it. The District Engineer desired to keep to that arrangement instead of reverting to the organization of the four Ranges as originally sanctioned. As I did not consider that any transfer of Talugs from one Range to another or a reduction in the number of Ranges ought to be made until the configuration of the new Talugs were decided on, I requested the District Engineer to organize the Ranges as originally sanctioned, but as it appeared from a subsequent representation of the District Engineer that to do so would

require

form no actual financial result.

require an exchange of accounts &c which would again have to be altered when the new Taluqs were constituted, I thought proper to allow the existing arrangement to stand, and authorized the continuance of the sanctioned establishment as a temporary measure, till the question of the boundaries of the New Taluqs should be decided.

10 The District Engineer of Madras recommended that the Nelloretta Taluq, which is comprised in Range No. 3, might be divided between Ranges No. 2 and 3, and as the grounds of this recommendation he explained that the Public Works on the Southern and Western borders of the Taluq are separated from each other and from the Northern side in which the 3rd Circle lies, by the Nelloretta and Sunneroady Hemmivadi Zamindaries which occupy the centre, that the Southern portion adjoins the 2nd Range, and the Western the 2nd, that it was, therefore, necessary for the Executive Officer in charge of the 3rd Range to detach and place a Sub Overseer to superintend the works in these portions while there were

Taluni
Linnal

were two Sub Overseers in the 1st and 2nd Ranges only, a few miles from those works and that the Executive Officer had to go about 18 miles to inspect the works in those detached portions, and on account of the Pulney and Trissumallay Hills skirting the Southern and Western parts of this Taluq. to return by the same road before he could continue his tour to the other parts of his range. Under this explanation I approved of this Sub Division of the Taluq, but as I was of opinion that no alteration should be made in this case as well as of that in Kadapa until the boundaries of the New Taluqs were determined, I informed those District Engineers that no alterations of the existing arrangements could be permitted before the sanction of Government was obtained.

11 These alterations and any other which may be rendered necessary by the configuration of the new Taluqs will be ascertained and made the subject of separate representation to Government.

Central Office of Works -
 Sepakham 21st January 1861.

P. L. May

J. A. Law Lieut. Col.
 Chief Engineer

Public Works Dept

No 429/4

Proceedings of the Madras Government
Under date the 8th ~~February~~ ^{March} 1860

Read the foregoing
letter from the Chief Engineer.

Submitting to Govt a
Statement of Range Establish-
ment as organized under the
sanction of Government dated 26th / ^{November 21st January 1860}
July last with certain alterations
not involving any additional
charge. No 427/

W. M.

The Government
sanction the alteration in the
clauses of the Ranges and
Establishments specified in
the para 6 of this letter, on the understanding
that they involve no increase
of charge. But they request
income to be furnished with a
statement shewing at one
view, in a clear and concise
form, the actual financial
result

Inclosed in a letter

from

The Chief Engineer

To the Secy to Govt

Dated 21st / ^{January} 1860

Dec 2 / ¹⁸⁵⁹ 1860

1859 204/60.

Self. Having the Plea
and designation of Range
in the Districts under
the Madras Presidency
as sanctioned on the 26th
Aug 1859 and the altera-
tion of the Statute.
must be referred by Govt.
The Engineer and an-
nounced by the Chief
Engineer as also the of-
ficial and documents
submitted for the Chief
Engineer (Range)

result of the arrangements
respecting establishments
proposed by the Chief Engineer
both on the present and
previous occasions in regard
to the entire department of
Public Works.

²⁵⁵
On the other parts
of the Chief Engineer's letter,
the Government will await
the receipt of the further
report promised in para 11.

The change in design-
ation referred to in para
12 is sanctioned.

The Government
approve entirely of
Col. Bell's Proceedings
as regards the altera-
tions which he has con-
sidered necessary.

W. H. D.

J. P.
