MILITARY DEPARTMENT.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following letter:—

From the Chief Engineer, Fort Saint George, 24th December 1859, No. 8730; to the Secretary to Government, Public Works Department.

Enclosures 3.

1 Letter from the Special Executive Engineer Jackatalla, No. 212, dated 1st December 1859.

1 Plan.

1 Abstract Estimate.

No. 2315, Public Works Department, dated 27th September 1859.

With reference to the Proceedings of the Madras Government marginally noted, calling attention to para 3. of a letter No. 6249, 7th September 1859, from the Officiating Secretary to the Government of India, your address suggesting for consideration, that the Privies attached to the married men's Quarters at Jackatalla should be placed further away from the main building. I have the honor to forward the accompanying Estimate amounting to Rupees 20,160 for ex-

tending the excavation of the Hill behind the married men's Quarters, for the purpose of erecting Privies at a distance of 100 feet from the main buildings in the stead of 30 feet and extending the covered passage to the same.

2. The Special Executive Engineer at Jackatalla has had a consultation with the Officer Commanding the station, the Officer Commanding Her Majesty's 3rd Battalion 60th Regiment of Royal Rifles, and the Senior Medical Officer on the subject, the result of which has been, that all were unanimous in thinking that the erection of Privies 30 feet only in rear of the married men's Quarters was much too close to the occupied rooms of the buildings and that a distance of 80 feet would be much more conducive to the health of the occupants as well as their comfort.

3. The first intention was that the Privies should be let into the Hill, but it has since been recommended, and I am of the same opinion, that it would be far preferable to clear away the whole space at a distance of 80 feet, causing an excess of Rupees 4,850 on the first proposal.

4. As the work should be executed as soon as possible, as the families of the Regiment may be shortly expected, I have the honor to solicit the early sanction of Government for the execution of the Estimate, amounting to Rupees (20,160) twenty thousand one hundred and sixty, to admit of which the expenditure on other works will be reduced to bring the general expenditure with the allotment.

5. Para. 4 of the same letter above alluded to, will form the subject of another letter.

ORDER No. 964, 8th March 1860.

1. Approved for immediate execution as proposed in para. 4.

2. With reference to the proposed mode of meeting the expenditure on this work, the Governor in Council desires whenever the Chief Engineer suggests any particular course in respect to the provision of funds, otherwise than by direct sanction, he will quote in the margin of his report, the rule under which Government are authorised to sanction the course proposed.
