*Proceedings of the Madras Government, Public Works Department,
for the month of March 1860.*

No. 90. Read the following letter from Colonel J. H. BELL, Chief Engineer, to J. D. BOURDILLON, Esq., Secretary to Government, dated Chépaük, 21st March 1860, No. 11,562!—

I have the honor to forward for submission to Government an Estimate amounting to Rupees 850 for building a new Head Sluice to the South Rájá Voikál, or Main Channel, from the lower Dam across the Mannyár in Tanjore, on which depends a revenue of about 32,000 Rupees.

1 Original letter from District Engineer, Tanjore, No. 332, dated 28th February 1860.
1 Abstract Estimate.

2. It appears that the old Channel head is about one and a quarter miles below the Dam, and in times of scarcity of water it receives no supply, when the distress of the people is very great. In 1858, when the river was very low, the Channel was extended so as to have its head above the Dam, at a cost of Rupees 526-14-4, but no Sluice was built; and as it is absolutely necessary that such a work should be provided, the present Estimate is submitted for early sanction, to be executed out of the Repair Funds of the District; for though a new work, it is strictly one of conservancy, as the Channel must be destroyed without it.

3. Captain Oakes has requested my sanction for the preparation of materials pending the sanction of Government, and this I have accordingly granted, and beg to request sanction for the Estimate, which has been examined and found correct, the amount being Rupees 850.

No. 91. ORDER THEREON, 28th March 1860, No. 643.

The Estimate for the sluice, Rupees 850, is sanctioned; and under the urgent circumstances of the case, the Government approve of the Chief Engineer's proceeding in directing the commencement of the work, in anticipation of sanction.

2. It is observed, however, that the District Engineer's letter, though received in the Central Office on the 3rd March, was not disposed of till the 21st.

(Signed) J. D. BOURDILLON,
Secretary to Government.

Manager

I have the honor to forward for
Submission to Government an estimate
amounting to Rupees 850 for building
a new Head Sluice to the South Rajah
Voikal or main Channel from the lower
Dam across the Munnayan in Tanjore
in which depends a Revenue of about
32,000 Rupees.

2. It appears that the old
Channel head is about $1\frac{1}{2}$ miles below
the Dam, and in times of scarcity of
water it receives no supply, when the
distress of the people is very great.
In 1858 when the river was very low
the Channel was extended so as to
have

have its head above the Dam at a
cost of Rupees 526-14-4 but no sluice
was built and as it is absolutely
necessary that such a work should be
provided the present estimate is
submitted for early sanction to be
executed out of the Repair Funds of
the District for though a new work
it is strictly one of Conservancy as
the Channel must be destroyed without
it.

3. Captain Oakes has request-
ed my sanction for the preparation of
materials pending the sanction of Government
and this I have accordingly granted &
beg to request sanction for the Estimate
which has been examined & found correct
the Amount being Rupees 850.-
