*Proceedings of the Madras Government, Public Works Department,
for the month of April 1860.*

No. 108. Read the following letter from Captain F. H. RUNDALL, Consulting Engineer for the Irrigation and Canal Company, to J. D. BOURDILLON, Esq., Secretary to Government, dated Pater's Garden, Madras, 3rd April 1860, No. 62 :—

The Agent has represented that the probable effects of the Company's operations will be to create an increased demand for the Section of the Trigonometrical Atlas, containing the portions of the country affected thereby and request, that the same may be brought to the notice of Government, in the hope that measures may be taken to secure an ample supply of them against their being required.

After the Godavery works were commenced, the application for the Map of Rajahmundry rapidly exhausted the supply, which it so happened was somewhat in excess of other sheets of the Atlas. A similar demand will doubtless follow the commencement of the Company's works. It would be desirable, therefore, to increase the supply to 100 copies of the above mentioned sheets in order to meet the probable demand.

No. 109. ORDER THEREON, 17th April 1860, No. 779.

Referred to the Superintendent of Stationery in order to his taking such measures on the subject referred to as he may think proper to obtain the necessary numbers of the parts of the Atlas referred to.

(Signed) J. D. BOURDILLON,
Secretary to Government.

exhausted the supply, which it so happened
was somewhat in excess of other sheets of the Atlas.
A similar demand will doubtless follow the com-
mencement of the Company's works - It would be
desirable therefore to increase the supply to 100 copies
of the above mentioned sheets in order to meet
^{probable}
the demand.

I have the honor to be
Sir
Your most obed^t servant
J. P. Russell Captⁿ
Consulting Engineer for
Irrigation & Canals &c
