Government of Madras.

Public Works **DEPARTMENT.**

G.O. No. 1247 Press Mis.-

E2-53:

Dated 3-6- 1862.

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department, 3rd June 1862.

No. 62. Read the following letter from Lieutenant-Colonel S. O. E. LUDLOW, Deputy Chief Engineer, Northern Circle, to Lieutenant-Colonel W. H. HORSLEY, Secretary to Government, Public Works Department, dated Chepauk, 20th May 1862, No. 309/V 66:—

SIR,

1 Letter from the District Engineer Vizagapatam, No. 32, dated 5th May 1862.
1 Estimate.

1. I have the honor to forward the report of the District Engineer Vizagapatam on the state of the Gubbada works, furnished in compliance with the orders of Government No. 592.

2. Captain Molony in this report, which is not a very full one, states that the works have been well executed, and that the injuries caused by the late freshes (already reported to Government) were not of a permanent nature and not due to inattention and bad workmanship.

3. He reports that the Channel will be completed for a length of two miles on the 10th instant, and will be available for irrigation so far and thence to Nursipatam through the old Channels whenever required.

4. Captain Molony explains the necessity for certain additions to the works, the cost of which amounts to 590 Rupees, a supplemental estimate for which he forwards.

5. These additions appear to be all necessary and judicious, and I beg therefore to recommend the supplemental estimate for sanction.

6. I would have sanctioned the additional outlay myself under the authority conveyed in Clause II, Paragraph 8, Chapter IV, New Public Works Code, had not the original estimate appeared already likely to be exceeded to the extent of some 4 or 5 per cent. in consequence of the damage caused by freshes.

7. The estimates have been examined and found correct, and the rates appear moderate.

No. 63. ORDER THEREON, 3rd June 1862, No. 1,247.

1. The supplemental estimate, Rupees 590, forwarded with the above letter is sanctioned, the funds to be provided from the general allotment of the District for the current year.

2. The Government observe that the injuries caused by the late freshes were not of a permanent nature, nor due to inattention and bad workmanship. They notice that the new Channel was expected to be completed by the 10th instant. The results obtained from this work should be specially reported for the information of Government.

(Signed) W. H. HORSLEY, Lieut.-Colonel,
Secretary to Government.
