508-509.		
Dated	27-3-	1862.

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department, 27th March 1862.

No. 508. Read the following Endorsement of the Acting Deputy Chief Engineer, Northern Circle, dated Chepauk, 20th March 1862, No. 219 /U. Y. 31.

Read the following letter from Captain F. T. HAIG, District Engineer Upper Godavery, to the Deputy Chief Engineer, Northern Circle, dated Dúmagudiam, 11th March 1862, No. 230 :—

SIR,

The accompanying papers form about one-third part of some Notes on the River Navigations of North America, which I wrote about eighteen months ago. I hoped then to have added a good deal more to what I had written, but the commencement of the river works shortly after rendered this impossible, and the Notes now submitted are almost exactly the same as I left them in September 1860. I have explained on a previous occasion that my original intention was to have completed a report upon my tours in America and Europe before I left England, and that two months' leave were at my request granted by the Home Government for this purpose, but that hearing that the Godavery works were likely to be commenced that year (1859), I requested that the leave might be cancelled, and hurried out to this country. In the hopes that these Notes upon a subject upon which very little information is available either in England or in this country may be thought worth printing, I now forward the first part which I have lately revised. The remainder will follow in a short time.

P. S.—The Notes are enclosed in another cover.

---

1 Letter from the District Engineer Upper Godavery, No. 230, dated 11th March 1862, with one packet of papers.

Submitting for the pleasure of Government a letter from the District Engineer Upper Godavery, dated 11th March 1862, No. 230, conveying a request that certain Notes upon Lines of Inland Navigation in North America may be printed by the Government Printing Establishment.

(Signed) J. OUCHTERLONY, Lieut.-Colonel,
Acting Deputy Chief Engr., Northern Circle.

No. 509. ORDER THEREON, 27th March 1862, No. 587.

Ordered accordingly that the Notes upon Lines of Inland Navigation in North America received with the foregoing letter, be printed as a Selection in the usual book form.

(Signed) W. H. HORSLEY, Lieut.-Colonel,
Secretary to Government.

District Engineer Upper Godavery

To
The Deputy Chief Engineer
Northern Circle
D. P. W.
Madras

Sir,

The accompanying papers form about one third part of some notes on the river navigations of North America, which I wrote about eighteen months ago. I hoped then to have added a good deal more to what I had written, but the Commencement of the river works shortly after rendered this impossible, and the notes now submitted are almost exactly the same as I left them in September 1860. I have explained in a previous occasion that

that my original intention was to have completed a report upon my tours in America and Europe before I left England, and that two months leave were at my request granted by the Home Government for this purpose, but that hearing that the Godaury works were likely to be commenced that year (1859) I requested that the leave might be cancelled, and hurried out to this country.

In the hope that these notes upon a subject upon which very little information is available from ~~work~~ printing, I now forward the first part which I have lately revised. The remainder will follow in a short time.

I have the honor to be
Sir
Your most obedient Servant
Macq Capt.
District Superintendent P.W.D.

P.S. The notes are enclosed in another cover.
