Mis.423-424Dated 20-1-1864Not to be folded or roughly handled

1-

*Proceedings of the Madras Government, Public Works Department,
20th January 1864.*

No. 423. Read the following Proceedings of the Madras Government, in the Revenue Department, dated 15th January 1864, No. 95:—

Read the following letter from the Acting Consulting Engineer for Irrigation and Canal Company.

Forwards for the consideration of Government two letters, } (Here enter 11th September 1863, No. 62.)
one from the Chief Engineer of the Company and the other
from the Collector of Kurnool, relative to the distributing
channels and the quantity of water required per acre.

The Government consider that one cubic yard of water per hour per acre would be altogether insufficient, but the question is one that can only be settled by actual experiment. Colonel Ludlow is requested to make arrangements with Colonel Cotton, the Superintending Engineer and the Collectors of the Districts through which the Irrigation Company's Canal will pass for a series of careful experiments, as soon as water is available. Meanwhile, every precaution should be taken to prevent wilful waste of water by the Ryots.

(True Extract.)

(Signed) J. D. SIM,
Secretary to Government.

No. 424. ORDER THEREON, 20th January 1864, No. 209.

Communicated to the Consulting Engineer, Irrigation and Canal Company.

(True Extract.)

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

To the Consulting Engineer, Irrigation and Canal Company.

Proceedings of the Madras Government.

Read the following letter
from the Acting Consulting Engineer for
Irrigation and Canal Company.

Forwards for the consideration
of Government two letters, one from
the Chief Engineer of the Company
and the other from the Collector
of Tirunelveli relative to the distribu-
ting channels and the quantity
of water required per acre.

(Here enter 11th Sept/63
N: 62)

Order thereon 15 January 1864 N: 90.

The Government consider
that one cubic yard of water per hour
per acre would be altogether insufficient -
but the question is one that can only
be settled by actual experiment - Colonel
Ludlow is requested to make arrangements
with Colonel Cotton, the Superintending
Engineer

Engineers and the Collectors of the
Districts through which the Irrigation
Company's Canal will pass for a series
of careful experiments, as soon as water
is available - Meanwhile every precaution
should be taken to prevent wilful waste
of water by the ryots.
