*Proceedings of the Madras Government, Revenue Department,
20th July 1864.*

No. 306. Read the following letter from Lieutenant-Colonel F. J. B. PRIESTLEY, Superintendent of Revenue Survey, to J. D. SIM, Esq., Secretary to Government, Revenue Department, Fort Saint George, dated Bangalore, 24th June 1864, No. 4031/7:—

SIR,

1. In reply to G O. 28th April 1864, No. 737, I have the honor to inform you that in a letter dated 16th instant, Mr. Doderet, the Government Mathematical Instrument Maker, reports on the last two of the Theodolites by Barrow sent to him for examination, that they possess the same faults as the others by the same maker.

2. Of the 12.5 inch Everest pattern Theodolites five were issued without close examination to different Survey Parties. Of the others reported on by Mr. Doderet four have been repaired at an average cost of Rupees 15 each, the others can in like manner be made serviceable at a similar charge unless Government be of opinion that it is desirable some should be sent home for verification of the unfavourable reports. In this case, I would recommend that two only be sent as but few remain in Store, and the calls for the supply of instruments are apparently on the increase principally on account of the small Survey Establishments sanctioned for employment under the Collectors of Districts.

3. The Transit Theodolites by the same maker (as already reported) do not seem defective except that they require new object glasses, which for five Transit instruments have already been supplied at a cost of Rupees 35.

4. Until the permission of Government is received no more of these instruments will be sent for repair.

No. 307.

ORDER THEREON, 20th July 1864, No. 1,269.

MISCELLANEOUS.

			Everest Pattern.

Repaired	...	...	5
			2

The Government gather from this letter and from the Acting Superintendent's letter of 8th December 1863, No. 954/56, that three Everest pattern Theodolites and two Transit Theodolites by Barrow remain to be put in order. Of the former, two, as now proposed by the Superintendent, will be forwarded by him to this Office properly packed, for transmission to England. The remaining one of the Everest pattern as well as the two Transit Theodolites may be sent to the Mathematical Instrument Maker for repair.
