Letter from the Administration
 Report for the 22 Division for 1863/64.

22- Of the amount expended on the
 Principal (842,456 and) for Special repairs,
 which will be continued after the 1st May
 to the extent of the estimate of 5074. It
 provides for rebuilding a portion of the
 ancient ground wall to the length of about
 20 yards, owing to a subsidence of the founda-
 -tions, occasioned by the River having
 taken a new direction and having
 produced a whirl between two fragments. The
 wall at this point had in previous years
 been washed by sand and did not appear to
 require protection. It will now be protected
 by a rough stone slope in front and a consid-
 -erable quantity of stone is thrown in front
 of the ancient ground wall every year, but
 the operation proceeds at a slow rate &
 more is desirable, and I would propose in
 future to allow for a more liberal expenditure
 on this item.
