No. 430.

ORDER THEREON, 19th September 1864, No. 2,729.

1. The Superintending Engineers of Divisions were requested, in Proceedings dated 6th May 1864, No. 1,302, to submit statements of all articles of stock which are unserviceable, or which are not likely to be required for use during the next twelve months, in view to sanction being granted for their disposal, in accordance with the instructions of the Supreme Government, conveyed in a letter dated 6th April last, No. 10.

2. The Government will now proceed to pass orders on such of the statements, submitted in pursuance of the above requisition, as require notice.

3. The Superintending Engineers of the 2nd and 6th Divisions will take steps for disposing of the articles included in their lists.

4. The Superintending Engineer of the 3rd Division reports that he has ordered the sale of the articles entered in his list, which however, includes Pickaxes, Jumpers, Priming Needles Mamooties, &c. As these come properly under the category of "Tools," the orders of the Government of India do not apply to them; but if they be unserviceable, there is no objection to the course adopted by Colonel Hemery.

5. From the statement submitted by the Superintending Engineer, 4th Division, the Government note that quantity of galvanized pipes, angles, &c., valued at Rupees 712-3-7, and which were originally procured by Major Rawlins, are in stock, but are not likely to be required by Captain Wood. Colonel Boileau should have stated the specific purposes for which they were procured and why they were not used as intended. As they are represented to be generally in fair order, the Superintending Engineer will arrange for their being despatched to the Public Works Store Department, at the Presidency. This course should also be followed as respects the following articles :—

- 11 Stink traps in the Fort Range, Presidency.
- 96 Feet earthenware piping in do.
- 68 Square feet perforated zinc sheet in do.
- 175½ lbs. Europe cast and blister steel in do.
- 1 Boring apparatus in Mount Range, Madras.
- 1 Double crab in do. do.
- 1 Single do. in do. do.
- 1 Prismatic Compass with stand in No. 3 Range.

*Proceedings of the Madras Government, Public Works Department,
19th September 1864.*

6. Under the circumstances brought to notice by the Superintending Engineer, the Government approve of the mode in which Mr. Fraser proposes to utilize the dredge belonging to the East Coast Canal.

7. The other articles entered in Colonel Boileau's list may be sold.

8. The Government grant authority for the sum of Rupees 1,889-11-8, being the difference between the original value of the articles, noted in the margin, purchased by the Executive Engineer Bangalore, and the amount of sale proceeds, being written off the accounts.

	RS.	A.	P.
Timber	1,645	1	8
Bandies and Bullocks	244	10	0
	1,889	11	8

9. The Controller of Public Works Accounts submits a list of unserviceable articles of stock in Wellington, the value of which is entered in the Neilgherry Range accounts, as Rupees 18,482-8-7. The Superintending Engineer has, however, included in this list the value of certain temporary buildings, which were erected when the Barracks were in progress, and paid for out of the allotment for the Barracks, the charge having been exhibited under the head "District Stores," to which all the large stock of materials used upon that work was debited until

* Rupees 13,628-7-2.

issued to the work. The Controller proposes that the original cost* of these temporary buildings should be written off, and that the buildings should be brought on the dead stock of the District books like the permanent Barrack buildings. Before acceding to this latter arrangement, the Government request to be furnished with the Superintending Engineer's opinion, together with a report on the condition of the buildings. It is observed that some of the buildings have already been sold, and that the amounts entered in column 6 of Major Farewell's list, represent the loss by depreciation. Some of the buildings it is proposed to dispose of, as not being required for the purposes of the Department, and some others were destroyed by fire, and the amounts shown in column 6 represent the value of the bricks still available for use.

10. The Government approve of the sale of the unserviceable stores at Wellington.

(Here enter No. 2,730, dated 19th September 1864.)

Sir,
I have the honor to report
that, as I have always cleared out
my Store yards from time to time on
the system ordered by the Government
of India as laid down in the Circular
that accompanied G. O. No. 1302. 6th Inst.,
I have only the small stock of worn
out articles on which have accumulated
since the last auction - which I had
already given instructions for the sale of.

Office of the Controller
of P.W. Accounts
Madras 8th Sept 1864

N^o 1078

From
Lieut. Colonel C. V. Williamson R.E.
Controller of P.W. Accounts

To
Colonel J. A. Orr R.E.
Secretary to Government P.W.D.

Sir,

I have the honor to sub-
mit a List of Unserviceable articles
of Stock which remained on the
Wellington Barracks works on the 30th
April 1864 and which the Superin-
tending Engineer forwards with reference
to Government Order 6th May 1864
N^o 1302...

2. The value at which the
articles stored in the accounts of the
Wellington or rather Nilgerry Range
is Rupees 184.82-8-7 but the Super-
intending Engineer includes in this List
the value of certain temporary
buildings which were erected when
the Barracks were in progress and
paid for out of the barracks funds
but kept under the head Dis-
tributed stores to which all the large
Stock

Enclosed
List

List of unserviceable
Stock recommended
to be sold -

24/10/64

Stock of Materials used on that work was retained, until wrought and issued to the work.

3. It was probably expected that the profit derived from the working of the Wood-mill, and the use of the Saw Mill, would cover all payments made on account of temporary buildings and thus remove the debits to the head "District Stores" on account of these buildings, but there was no such profit realized, and there is no alternative but to write off the value of the Buildings the original cost of which amounts to Rupees 13,628. 7. 2. and makes up the total of the List to Rupees 32,110. 15. 9.

4. I do not consider it necessary to transfer the value of the Buildings which are in a serviceable state by a Book adjustment to the head Military Buildings as the cost of them was paid for so many years ago.

ago. but these buildings may be brought on the Dead stock of the District Books like the permanent Barrack Buildings.

Office of the Controller
of M. Accounts

September 1/64

~~_____ a _____~~ 8th September 164

The Superintending In-
gineers of Railroads were requested
in Pro: of 6 May 1864, to
submit statements of all
articles of stock which are
unserviceable, or which are not
likely to be
required for use during the
next 12 months, in view of
sanction being granted for their
disposal, in accordance with
the instructions of the Supreme
Govt. - Conveyed in a letter
of 6 June last to do.

The Govt will now pre-
ceder to paper orders on ^{such of} the state-
ments, submitted in pursuance
of the above requisition, as require
notice.

The Supg Engineers of
the 2^d & 6th Divs will take steps
for disposing of the articles in-
cluded in their lists.

The Supr. Ingr of
the Gov. reports ~~that he has~~
the sale of the articles entered
in his list, which ~~is no longer~~
however, includes Pickaxes, Jammers,
Priming needles, Steamboats &c.

As these "come properly under
the category of "Tools," the
Notes of the "Govt. of India
do not apply to them; but
if they be "in-serviceable, there
is no objection to the course
adopted by Col. Monierg.

From the statement
submitted by the Shiping Engrs
Genl, the Govt notes that a quantity
of galvanized pipes, angles, &c.,
valued at Rs 7 1/2 - 3-7, & which

were originally procured by Major Rawlins, are in stock, that are not likely to be required by Capt. Wood. Col. Boreau should have staked the specific fur-
proves for which they were procured, & why they were not used as intended. As

they are represented to his general
and fair order, the Superintendents will
arrange for their being despatched
to the Presidency P. W. Store
at the Presidency.
Dept. This course should also
be followed as respects the
following articles.

11 Shink traps in the Fort Range, B.C.
98 feet earthenware piping in do
68. S. St. perforated zinc sheet in do
175 ft. Europe Cast & Blister steel.
1 Boring Apparatus in Mount range, B.C.
7 Double Crab in do do
1 Single do in do do
1 Chromatic Compass with stand in B.C.

Under the circumstances
brought to notice by the Supy
Eng^r, with regard to the ~~Dredge~~
~~belonging to the E. C. Canal~~,
the Govt approve of the mode in
which Mr. Treace proposes to

utilize the Dredge boat belonging to the S.C. Canal.

The other articles entered in Col. Boileau's list may be sold.

The Govt grant authority for the sum of Rs. 1889-11-8, being the ^{difference between the} original value of the articles, noted in the margin purchased by the Executive Eng. Bangalore, & the amount of sale proceeds, being written off the accounts.

The Controller of W. Accounts submits a list of unserviceable articles of stock in Wellington, the value of which is entered in the Neilgherry Range accounts, as Rs. 18482-8-7.

The S. Eng. has, however, included in this list the value of certain temporary buildings, which were erected when the Barracks were in progress, & paid for out of the allotment for the Barracks, the charge ^{having} been exhibited under the head "District Stores", to which

Journal - No 1845-1-8

Pullocke 1889-11-8

R. 13,628-7-

to the large stock of materials used upon that work was debited until issued to the works. The Controller proposes that the original cost of these temporary buildings should be written off, & that the buildings should be brought on the Dead Stock of the District books like the permanent Barracks buildings. Before acceding to this latter arrangement, the Govt request to be furnished with the S. Eng. Eng's opinion, ~~to be~~ together with a report on the condition of the buildings. ~~which~~ It is observed that some of the buildings have already been sold, & that the amounts entered in Column 6 of Major Farwell's list, represent the loss by depreciation. Some of the buildings it is proposed to depreciate as not being required for the purposes of the Dept. & some others were destroyed by fire, & the amounts shown in Column 6 represent the value of the
