*Proceedings of the Madras Government, Public Works Department,
12th November 1861.*

No. 236. Read the following letter from Captain H. TULLOCH, R. E., Special Executive Engineer, to Colonel C. A. ORR, R. E., Secretary to Government, Department Public Works, dated Madras, 4th November 1861, No. 24:—

SIR,

1. I have the honor to request you will kindly inform me how many copies of the report on the Drainage project, and how many of the specifications of the works Government would wish to have printed.

2. I beg respectfully to ask the question now, inasmuch as I wish to begin printing some of the plates to accompany the Report at once. They are already on the stone.

3. As the specifications will not have any interest except for Government and for the Engineers and Contractors who may hereafter be connected with the work, 25 copies would in my opinion be ample.

4. The Report, however, directly and indirectly concerns so many Departments, that I think it would be better to have a large number of copies printed, especially as the plates on the stones must be effaced as soon as the number ordered are struck off. As I have no experience as to the number of copies usually printed of any "Selections from the Records of Government," I am unable to suggest with any confidence how many copies of the Report would suffice.

No. 237. ORDER THEREON, 12th November 1861, No. 3,243.

The Government consider that it will be sufficient to print 200 copies of the Report, and 50 copies of the specifications referred to in this letter.

(True Extract.)

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

To Captain H. Tulloch, Executive Engineer.

Sir

I have the honor to request you will kindly inform me how many copies of the report on the Drainage Project and how many of the Specifications of the Works Government would wish to have printed.

2. They respectfully ask the question now inasmuch as I wish to begin printing some of the plates accompanying the Report at once. They are already on the Stone.

3. As the Specifications will not have any interest except for Government and for the Engineers and Contractors who may hereafter be connected with the work 25 copies would in my opinion be ample.

4. The report however directly and indirectly concerns so many Departments

Departments that I think it would
be better to have a large number of
Copies printed especially as the plates
on the Stones must be effaced as soon
as the number ordered are struck off.
As I have no experience as to the number
of Copies usually printed of any or
"Selections from the Records of Government."
I am unable to suggest with any con-
fidence how many Copies of the Report
would suffice.

I have the honor to be
Sir

Your Most Obedient Servant
