PUBLIC WORKS DEPARTMENT.

Public.

FORT SAINT GEORGE,

6th October 1864.

No. 70.

No. 2,878.

From

COLONEL C. A. ORR, R. E.,

Secretary to the Government of Fort Saint George, P.W.D.,

To

The Secretary to the Government of India.

SIR,

1. In reply to your letter of the 8th July last, No. 43, I am directed to state that two Privies have been constructed in this Presidency on the standard plan. One of these, on the north-east Berm of Fort Saint George, although completed, has not yet been used. The other is still under construction in connection with the Guard Room of the new Dragoon Barracks at Bangalore.

2. The Superintending Engineer, 7th Division, reports that in one of the buildings in Malabar in which an opening of 15 inches had been left between the walls and roof, in order to protect the latter from the ravages of white-ants, it was found necessary, as so much rain drifted through, to reduce the space to 6 inches. In the opinion of that Officer it would be advisable to diminish to this extent the width of the opening in Privies to be hereafter constructed according to the standard plan. The Superintending Engineer, 4th Division, also considers that the space should be reduced to prevent inconvenience by the rain beating in.

I have the honor to be,

Sir,

Your most obedient servant,

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

Exd. S. T. Augustin.

To
Colonel C. A. Orr R. E.
Secretary to Government P. W. D.

Sir,

With reference to the Proceedings of
Government N^o 2340 dated 16th August 1864,
I have the honor to state that the only Privy in
this Division, constructed so far in accordance
with the standard design as to leave a space
between the Roof and the top of the screen
wall, is on the North east Berm of Fort St George.
This Privy, though completed some time, has not
yet been used; but I apprehend that in the
North east monsoon, persons resorting to the it
Privy will be placed to much inconvenience
by

Supg. Engineer's Office
Columbatare 2nd September 1864

From Lieut Colonel G. W. Walker R.E.
Superintending Engineer

The Secretary to Government
Depart. Public Works

Madras

Sir, With reference to G.O. N^o 2510 of the
18th August 1864, I have the honor to
report that if large openings are allowed
between the Walls and Roofs of Divies
at Wellington and the European Stations
and Outposts in Malabar they would
cause great inconvenience during the
heavy weather in the beginning of the
Monsoon especially on the Western
Coast as in one building in Mal.
abar in which an opening of 15 inches
was left to protect the Roof from the
ravages of white ants, it was
found that so much rain drifted
through that the opening had to be
reduced to 6 inches, and therefore
it would be better to diminish
the apertures in question from 18 to
6 inches.

I have the honor to be
Sir,
Your most Obedt Servant

G. W. Walker R.E.
Superintending Engineer

Ordered that the following
letter be despatched.

No 2878
The Secretary to the
Govt of India
Sir,

In reply to your letter
of the 8th July last, I
am directed to state that two
premises have been constructed in this

Presidency on the standard plan.

One of these, ^{on} at the north-east corner of Fort St George, although completed, has not yet been used. The ~~other~~ ^{other} is still under construction in connection with the guard room of the New Dragoon Barracks at Bangalore.

The Surveyor & Co reports that in one of the buildings in Malabar in which an opening of 15 inches had been left between the walls & roof, in order to protect the latter from the ravages of white ants, it was found ^{necessary} ~~that~~ as much rain drifted through, to reduce the space to 6 inches. In the opinion of that Officer it would be advisable to diminish to this extent the width of the opening in privies to be hereafter constructed according to the standard plan.

The Surveyor & Co also considers that the space should be reduced to prevent inconvenience by the rain beating in.
