Public Works DEPARTMENT.

G.O. No. 2422	Press
484-485	Mis.
Dated 21-8	1865.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
21st August 1865.*

4
No. 984. Read the following letter from Captain J. F. FISCHER, R. E., Controller of Public Works Accounts to Colonel C. A. ORR, R. E., Secretary to Government, Department Public Works, dated Madras, 10th August 1865, No. 942 :—

SIR,

1. I have the honor to forward herewith the estimate of Petty Establishments to be maintained in this Presidency during the year 1865-66, prepared from revised estimates forwarded to this Office

Enclosures 43, with 2 Statements.

by Superintending Engineers, under instructions in G. O. 10th February 1865, No. 394. A detailed Statement, giving the number of the different classes of servants for each District, agreeably to the form of Appendix C., Part 2 of Budget for 1865-66, is also forwarded, the estimates do not give the rates of pay for each of the various classes of servants, as the rates are very dissimilar for men of the same class, and in several instances provision has been made only for a few months in the year for certain classes. The local returns are, therefore, forwarded with that compiled in this Office for any reference.

2. Some of the returns exhibit details of the works in which the Establishments are to be employed, and it appears that a great portion of them are employed as Superintendents of Roads, and paid from the maintenance grants. Superintending Engineers were asked to furnish this information, respecting all such Districts as are provided with such grants, so that the allowances for the roads may be recommended to be reduced, and the saving added to the grant for Petty Establishments, viz., Rupees one lac, which is quite insufficient to meet the wants of *all* the Districts. With the exception of the Superintending Engineer, 6th Division, all others have furnished this information, Captain Oakes did not apparently understand the object

of the requisition and applied for further information, which has been furnished to him, and he has not yet given the required details. It will be seen that of the sum of Rupees 1,80,002, the total amount

of the several estimates for Petty Establishment, Rupees 66,317, are properly chargeable to maintenance grants, which latter can be reduced by transfer to the head “Establishments” (with the previous permission of the Government of India), when the excess to be provided for will be only Rupees 13,685, of which a great

portion may be obtained from reductions of maintenance grants in the 6th Division, and the remainder set off against the general savings under the head “Establishments,” if no further reduction can be made. The estimate of the Superintending Engineer, 7th Division, appears to be comparatively much higher

than that of all Divisions, and Lieutenant-Colonel Walker does not furnish particulars

*Proceedings of the Madras Government, Public Works Department,
21st August 1865.*

Letter No. 6, dated 27th May 1865, from Superintending Engineer, 7th Division.

of the grants from which the deductions on account of maintenance can be made, but he states that the amount on the aggregate is Rupees 18,312, at 10 per cent. on the total of the grants for his Division. The amount to be deducted from each grant should, however, be furnished by Superintending Engineers to Government before the transfer is ordered, so that the head "Repairs" may be correspondingly reduced, and this Office be supplied with the means of checking, in order that the outlay on such grants may not exceed the diminished sums to be allowed under the arrangement now proposed. The reduction from the maintenance grants will not actually curtail the funds available for each work, as the only result will be a transfer of a portion of the grant to the head "Establishment," thereby charging to the head "Repairs" only such portion properly debitable to it. This was explained to the Superintending Engineer, 6th Division, who appeared to think that his allotment for maintenance of roads will suffer by the proposed transfer.

3. In the grants of all the other works for which Petty Establishments are to be maintained, whether original works or repairs, a like saving or reduction will be feasible (though not to such a large extent as in the case of maintenance grants), and a corresponding saving effected in the amounts of the estimates for these works. Superintending Engineers should, therefore, be enjoined to avail themselves of these savings as speedily as possible, by suggesting transfers in time to admit of the funds being utilized, and to propose reductions of such portions of sanctioned estimates as can be diminished by the charge of Superintendence to the head "Establishments."

4. The Superintending Engineer, 2nd Division, has included provision for the Establishment for the Civil Dispensary at Guntoor, as also the Workshop at Bezwadah. The latter is, I consider, not admissible, as the charge should be met from the value of the work executed at the Workshop; but it is not known whether this Factory is self-supporting, as no accounts of its working are furnished to this Office. Colonel Winscom notes in his return that the scale drawn up by him, with reference to the reduced allotment for 1865-66, is subject to modification, as the Petty Establishments will have to be increased when additional funds are granted. It will not do to alter the sums once fixed in the estimate for the year, as the distribution of funds in the estimate should have been based on the average expenditure for Petty Establishments during past years, as well as with reference to the reduced allotment for the current year. It however rests with the Government to determine whether any additional grant is to be made for the 2nd Division.

5. The estimates of the Superintending Engineers, 4th and 8th Divisions, have been assumed as providing for the special establishments allowed by the orders noted in the margin to be charged to the head "Petty," though no distinct entry of the items is apparently made therein.

6. The delay in the submission of the present estimate is owing to the non-receipt in time of the local returns, these from the Superintending Engineer, 3rd

*Proceedings of the Madras Government, Public Works Department,
21st August 1865.*

Division, having come to hand only on the 31st ultimo, under wrapper, without any letter, explaining the cause of delay. The estimate itself does not show clearly the amount for each District, which this Office had to work out by separation of the several works in his Division entered promiscuously in the estimate. The estimates now forwarded by the Superintending Engineer, 3rd Division, are, I may observe, in excess of that furnished by him on the 6th January 1865, when he submitted one for Rupees 19,863, while the present is estimated for Rupees 28,392. The requirements for each Range are not shown in the 3rd, 7th, and 8th Divisions, estimates which the Superintending Engineers will be called upon to furnish to this Office after sanction is accorded to the general estimate now sent, as this information will be necessary to check the outlay in each Range as given in the accounts rendered therefrom.

7. I beg also to forward detailed statements of the expenditure on Petty Establishments in the 3rd, 6th, and 8th Divisions, during the years 1861-62, 1862-63, and 1863-64, forwarded by the Superintending Engineers apparently under instructions from Government. The other Superintending Engineers have not furnished like returns. I transmit at the same time the covering letter of the Superintending Engineer, 3rd Division.

MADRAS,
10th August 1865.

(Signed) J. F. FISCHER, Captain, R. E.,
Controller of Public Works Accounts.

Proceedings of the Madras Government, Public Works Department,
21st August 1865.

No. 685.

ORDER THEREON, 21st August 1865, No. 2,422.

ESTABLISHMENT, No. 57.

1. With this letter the Controller of Public Works Accounts submits the revised Statement of Petty (Extra) Establishments called for in the orders of Government No. 394, dated 10th February 1865. The total estimated cost of these Establishments for the current year is given at Rupees 1,80,002. Deducting from this amount Rupees 504 for the Work-shops at Bezwadah, and adding Rupees 804* for the temporary office establish-ment at Paumbem, the net amount required for Petty Establishments is Rupees 1,80,302, to meet which, Rupees 1,66,317 are available, leaving a balance of Rupees 13,985 to be provided from reductions on the maintenance grants for roads, &c., of the 6th Division, and from savings on the general allotment for Establishments.

* Vide G. O. No. 1,427, dated 27th May 1865.

Budget grant for Petty Establish-ments	Rs. 1,00,000
Transfers from maintenance grants of the 1st, 2nd, 3rd, 4th, 5th, 7th, and 8th Divisions	66,317
	1,66,317

2. With the foregoing modifications the Government approve of the proposed distribution of the Petty Establishments, and they will be prepared to apply for the sanction of the Government of India to the requisite transfers of funds on receipt from the Superintending Engineers of a detailed statement, showing the reduction to be made on each maintenance grant in the Districts under their charge. This statement should be submitted at an early date, through the Controller of Public Works Accounts.

3. The Government are unable to allot funds for the Bezwadah Workshop Establishment, the cost of which must be debited to the out-turn of the Factory. The Medical establishment, which the Controller states is applied for by the Superintending Engineer of the 2nd Division, on account of the Civil Dispensary, appears to be that for the Bezwadah anicut, sanctioned in G. O. No. 3,249, dated 9th November 1863.

4. As the Superintending Engineer of the 4th Division has provided in his Statement of Petty Establishments for the two temporary Overseers employed on the East Coast Canal, the Orders of Government No. 1,756, dated 23rd June 1865, will be considered cancelled.

5. The Establishments applied for in the 3rd Division are very large, and the Government will look to the Superintending Engineer to reduce the expenditure as much as possible.

6. The savings adverted to in paragraph 3 of Captain Fischer's letter should be utilized by the local Officers.

(True Extract.)

No 942.

From
Captain J. F. Fischer. R.E.
Controller of P.W. Accounts.
To
Colonel C. A. Carr. R.E.
Secretary to Government. D.M.

Sir,

I have the honor to forward here-
with the Estimate of Petty Establishments
to be maintained in this Presidency during
the year 1865/66 prepared from revised
Estimates forwarded to this Office by Super-
intending Engineers under instructions
in G.O. No 10th February 1865 No 394. A
Detailed Statement giving the number
of the different classes of servants for
each District agreeably to the form of
Appendix C part 2 of Budget for 1865
/66 is also forwarded; the Estimates do
not give the rates of pay for each
of the various classes of servants as the
rates are very dissimilar for men of
the same class, and in several instances
provision has been made only for a
few months in the year for certain
classes. The Local Returns are therefore
forwarded with that compiled in this
Office for any reference.

Yours
Some

2. Some of the Returns exhibit details of the wants in which the Establishments are to be employed, and it appears that a great portion of them are employed as Superintendents of roads and ponds from the maintenance grants. Superintending Engineers were asked to furnish this information, respecting all such Districts as are provided with such grants, so that the Allowances for the roads may be recommended to be reduced and the saving added to the grant for Petty Establishments viz: Rupees one lac, which is quite insufficient to meet the wants of all the Districts. With the exception of the Superintending Engineer 6th Division, all others have furnished this information, Captain Barker did not apparently understand the object of the requisition and applied for further information which has been furnished to him, and he has not yet given the required details. It will be seen that of the sum of Rupees 1,80,000 the total amount of the several estimates for Petty Establishment Rupees 66,317 are properly chargeable to maintenance grants which latter can be

reduced

1865 No: 482.

reduced by transfer to the head "Establishments" with the previous permission of the Government of India, where the excess to be provided for, will be only Rupees 13,685 of which a great portion may be obtained from reductions of maintenance grants in the 6th Division and the remainder set off against the general savings under the head "Establishments," if no further reductions can be made. The estimate of the Superintending Engineer of the Division appears to be comparatively much higher than ^{than} of all other Divisions, and Lieut. Colonel Walker does not furnish particulars of the grants from which the deductions on account of maintenance can be made, but he states that the amount on the aggregate is Rupees 18,312 at 10 Per Cent on the total of the grants for his Division. The amount to be deducted from each grant should however be furnished by Superintending Engineers to Government before the transfer is ordered so that the head "Repairs" may be correspondingly reduced, and this

Total of Estimates - Rs. 1,80,000
Less chargeable to
maintenance grants - 66,317
To be provided for 1,13,683
Provision in Budget 1,00,000
Excess 13,683

note P.O. No: 1627
of 27th May 1865

No: 804 for the temporary
Office Establishment at

Office

Office be supplied with the means of check-
ing, ^{in order} that the outlay on such grants
may not exceed the diminished sum to
be allowed under the arrangement now
proposed. The reduction from the mainte-
-nance grants will not actually curtail
the funds available for each work as
the only result will be a transfer of a
portion of the grant to the head "Estab-
-lishment" thereby charging to the
head "Repairs" only such portion proper-
-ly debitable to it. This was explained
to the Superintending Engineer of the Divi-
-sion who appeared to think that
his allotment for maintenance of roads
will suffer by the proposed transfer.

3. In the grants of all the
other works for which Petty Establishments
are to be maintained whether Original
Works or Repairs, a like saving or reduction
will be feasible / though not to such or
large extent as in the case of maintenance
grants / and a corresponding saving effect-
-ed in the amounts of the Estimates for
these works. Superintending Engineers
should therefore be enjoined to avail
themselves of these savings as speedily
as possible by suggesting transfers in
time

vide G.O. 11th
Sept. 1863 and
9th Nov. 1863
Nos 2612 + 3249.

time to admit of the funds being utiliz-
-ed and to propose reductions of such por-
-tions of sanctioned Estimates as can be
diminished by the change of Superintend-
-ence to the head "Establishments."
4. The Superintending Engineer 2^d Divi-
-sion has included provision for the Estab-
-lishment for the Civil Dispensary at
Guntur as also the Workshop at Bez-
-wadah. The latter is, I consider not ad-
-visable as the charge should be met
from the value of the work executed at
the Workshop, but it is not known
whether this Factory is self-supporting,
as no accounts of its working are furnish-
-ed to this Office. Col. Whistow notes
in his Return that the scale drawn
up by him with reference to the reduced
allotment for 1865/66 is subject to modifi-
-cation as the Petty Establishments
will have to be increased when additional
funds are granted. It will not do to
alter the sums once fixed in the Esti-
-mates for the year, as the distribution
of funds in the Estimate should have
been based on the average expenditure
for Petty Establishments during past
years as well as with reference to the
reduced allotment for the current year.

to you for me
Office - establishment at

It however rests with the Government to determine whether any additional Grant is to be made for the 2^d Division.

5. The Estimates of the Superintending Engineers 4th and 8th Divisions have been assumed as providing for the special Establishments allowed by the orders noted in the margin to be charged to the head "Petty" although no distinct entry of the items is apparently made therein.

B.D. 17th 407th
May and 25th June
1865 Nos. 1547,
1427, and 1756.

6. The delay in the submission of the present Estimate is owing to the non-receipt in time of the local Returns, those from the Superintending Engineer 3^d Division having come to hand only on the 31st ultimo under Wrapper without any letter, explaining the cause of delay. The Estimate itself does not show clearly the amount for each District which this Office had to work out by reparation of the several amounts in this Division entered promiscuously in the Estimate. The Estimates now forwarded by the Superintending Engineer 3^d Division, are, I may observe in excess of that furnished by him on the

the 6th January 1865 when he submitted one for Rupees 19,860 while the present is Estimated for Rupees 28,392. The requirements for each Range are not shown in the 3^d, 7th, and 18th Division Estimates which the Superintending Engineers will be called upon to furnish to this Office after sanction is accorded to the General Estimate now sent, as this information will be necessary to check the outlay in each Range as given in the Accounts rendered therefrom.

7. They also to forward detailed Statements of the expenditure on Petty Establishments in the 3^d, 6th, and 18th Divisions during the years 1861/62, 1862/63 and 1863/64 forwarded by these Superintending Engineers apparently under instructions from Government. The other Superintending Engineers have not furnished like Returns. I transmit at the same time the Covering letter of the Superintending Engineer 18th Division.

I have the honor to be
Sir,

Your most obdt. servant.

Wm. H. S. Esq. Captain R.E.

Controller of Public Works Accounts.

Under date the 28th August 1865

Read the following
From the Controller of P.W. Accounts

Submits with certain
remarks the Estimate of
Petty Establishments to be
maintained in this Presi-
cy during the year 1865/66

A. E. 10th August/65
No 942

W. J.

With this letter the Controller
of Public Works Accounts submits
the revised Statement of
Petty (Estab) Establishments
called for in the orders of
Government No 396 dated
10th February 1865. The total
estimated cost of these Estab-
lishments for the current
Year is given at Rs 1,80,000.
Deducting from this amount
Rs 504 for the workshops
at Begwadah, and adding
Rs 804 for the temporary
Office Establishment at

with S.O. No 1127
of 27th May 1865

Pambam, the net amount
 required for Petty Establishments
 is Rs 1,80,302, to meet which,
 Rs 1,66,317 are available, leaving
 a balance of Rs 13,985 to
 be provided from reductions
 on the maintenance grants
 for roads & of the 6th Division
 and from savings on the
 General Allotment for Estab-
 lishments.

With the foregoing modifi-
 cations the Government
 approve of the proposed dis-
 tribution of the Petty Estab-
 lishments, and they will
 be prepared to apply for the
 sanction of the Govt of India
 to the requisite transfers of
 funds on receipt from
 the Supt. Engineer of a
 detailed statement showing
 the reduction to be made
 in each maintenance grant
 in the Districts under their
 charge. This statement should
 be submitted at an early
 date through the Controller
 of P. & A. Accounts.

 1,66,517

G.O. No. 2612
 d/11.6.1863-

6
 The Government are
 unable to allot funds for
 the Begwadah workshop Estab-
 lishment the cost of which
 must be debited to the
 out-turn of the Factory. The
 Medical Establishment which
 the Controller states is ap-
 plied for by the Supt.
 Engineer of the 2nd Division
 on account of the Civil
 Dispensary appears to be
 that for the Begwadah
 sanctioned in G.O. No. 3249
 dated 9th November 1863.

As the Supt. Engineer
 of the 4th Division has pro-
 vided in his statement
 of Petty Establishments for
 the two temporary Overseers
 employed on the East
 Coast Canal, the orders of
 Govt No. 1756 dated 23rd
 June 1865 will be con-
 sidered cancelled.

The Establishments ap-
 plied for in the 3rd
 Division are very large
 and the Government will

Look to the Supt Engineer
to reduce the Expenditure
as much as possible -

The Savings adverted
to in para 3 of Captain
Fischer's letter should be
utilized by the local Offices -
