*Proceedings of the Madras Government, Revenue Department,
8th February 1865.*

No. 158. Read the following letter from F. L. MONCRIEFF, Esq., C. E., General Superintendent of Public Works Stores and Workshops, to Colonel C. A. ORR, R. E., Secretary to Government, Public Works Department, dated Chepauk, 30th January 1865, No. 795 :—

SIR,

1. With reference to the Order of the Madras Government, dated 12th January, No. 103,

2 Plans.

I have the honor to forward herewith two plans shewing the modes of applying the different

classes of power to the Rope Pump constructed by Lieutenant Curran.

2. Plan No. 1 is arranged that treddles may be applied to the rope pump now in the Horticultural Gardens.

3. Plan No. 2 is arranged for Bullock power; in this machine I would take the liberty of suggesting that a chain be used in place of a rope, as I am afraid rope will very soon decay and break, causing disappointment and delay when water is most required for irrigation.

4. I hope in a few days to have the honor of submitting another plan of a simple method of lifting water from wells, arranged also so that any country Carpenter and Smith can manufacture them.

Referred to the Revenue Department with reference to the orders in that Department, No. 3, dated 4th January 1865.

CHEPAUK,
2nd February 1865.

Secretary to Government, P.W.D.
