*Proceedings of the Madras Government, Public Works Department,
11th September 1865.*

No. 214. Read the following letter from Lieutenant-Colonel G. W. WALKER, R. E., Superintending Engineer, 7th Division, to Colonel C. A. ORR, R. E., Secretary to Government, Department Public Works, dated Coonoor, 26th August 1865, No. 107 :—

SIR,

1. I have the honor to submit for sanction the plan and estimate of a new Powder Magazine for the use of the Artillery at Mangalore, called for in G. O. No. 1,463 of 31st May; and being aware of its urgent necessity, I recommend appropriation of the amount required, viz., Rupees 1,500, from the Budget allotment for new Artillery Barracks at Cannanore, if no other funds are available.

2. I added two buttresses in the plan, which seem to be required.

No. 215. ORDER THEREON, 11th September 1865, No. 2,651.

MILITARY WORKS, No. 13.

1. As the work referred to in this letter is only an extension of the existing Station Magazine at Mangalore, its execution is approved of, and the estimate of its cost, amounting to Rupees 1,500, is sanctioned; but the attention of the Superintending Engineer is called to the proposed dimensions of the walls, which appear to the Government to be scarcely capable of sustaining the thrust of the arched roof of the Magazine.

2. The work may be proceeded with from the source indicated by the Superintending Engineer. The necessary transfer of funds is sanctioned.

(True Extract.)

(Signed) CHARLES, A. ORR, Colonel, R. E.,
Secretary to Government.

To the Superintending Engineer, 7th Division.

Proceedings of the Madras Government

Under date the 11th September 1865

Read the following

From the Supg Engineer of the

Submits for sanction Plan
for a magazine at Mangalore.

(There enter 26 August 1865 No 107)

As the work referred to in this letter is only an extension of the existing Station Magazine at Mangalore, its execution is approved of, and the estimate of its cost, amounting to Rs 1500, is sanctioned; but the attention of the Supg Engineer is called to the ~~the~~ proposed dimensions of the walls, which appear to the Govt to be scarcely capable of sustaining the thrust of the arched roof of the Magazine.

The work may be proceeded with from the source indicated by the Supg Engineer. The necessary transfer

Why put an arched roof to the Magazine? The very best kind of roof is a light one covered with iron - the connection with the ground being carefully made by a sufficient number of water pipes - this is far better than any number of lightning conductors
