*Proceedings of the Madras Government, Public Works Department,
6th October 1865.*

No. 138. Read the following letter from Captain J. MULLINS, R. E., Consulting Engineer for Irrigation and Canal Company, to Colonel C. A. ORR, R. E., Secretary to Government, Department of Public Works, dated Kurnool, 22nd September 1865, No. 85 :—

SIR,

1. With reference to the Order of Government, No. 2,473 of the 24th ultimo, I have the honor to report that the Chief Engineer Madras Irrigation and Canal Company states,* “that it is intended, in

* In a letter No. 705, 7th instant.

“the event of the Luckhowulli Reservoir
“being constructed, that the main road

“should be diverted at the Company’s expense along the margin of the tank,
“except when it can be carried across the smaller bays by an embankment and
“bridge. The line cannot, however, yet be determined, as it has not been decided
“at what level the calingulah is to be.”

2. It appears to me that the present is not the proper time for the consideration of details, such as that above noticed. The Company have simply asked that the site should not be rendered less likely to be available by the extension of Teak plantations, to the subsequent destruction of which objection might be made. When the project is brought forward for sanction, it will be necessary to see that due provision has been made for all requirements, and then the arrangements for the diversion of the road will, with many other details, come under notice. I may add also that the Government are directly interested in the non-enhancement of the value of sites which appear likely to be required for reservoirs, as under the contract the land required for these reservoirs will have to be provided by the State.
