*Proceedings of the Madras Government, Public Works Department,
10th October 1865.*

No. 195. Read the following letter from Captain J. MULLINS, R. E., Consulting Engineer for Irrigation and Canal Company, to Colonel C. A. ORR, R. E., Secretary to Government, Department of Public Works, dated Kurnool, 27th September 1865, No. 90 :—

SIR,

1. My last quarterly report of the Reservoir Survey operations was contained in a letter No. 18 of the 6th June last, and was for the quarter ending 30th April. The Chief Engineer's reports for May, June, and July hardly mention the subject, but a new site at Rajoly on the Toonga is mentioned as being the most promising site yet discovered, and the Executive Engineer, Bellary, was about to submit a plan and estimate for a Reservoir at this place.

2. I am about to visit with the Chief Engineer the several sites which have been examined on the Toonga and Budra rivers, and I hope after this inspection to be able to place Government in possession of more detailed information as to the result of the investigations than has hitherto been possible.

3. The quarter ending 31st July included some of the most rainy months of the year, and very little out-of-door work could have been done.

No. 196. ORDER THEREON, 10th October 1865, No. 2,992.

CIVIL WORKS, No. 34.

Ordered to be recorded.

(True Extract.)

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

W. H. informs that the Ch. Eng^r
reports for May June & July hardly
mention the subject of the
Reservoir survey operations, but a
new site at Rajah on the Tunga
is mentioned as the most promising
site yet discovered & hopes
after visiting the several sites
with the Chief Eng^r to be able
to place Government in possession
of more detailed information
as to the result of the investi-
gations
