*Proceedings of the Madras Government, Public Works Department,
19th October 1865.*

No. 433. Read the following letter from the Superintending Engineer, 1st Division, to the Under Secretary to Government, Public Works Department, dated Waltair, 28th September 1865, No. 1,106 :—

1. I have the honor to submit an Indent in triplicate for iron for the Government Workshop at Dowlaishweram. The quantity indented for is about enough for one year's consumption.

2. I particularly request that the Store and Shipping Departments at Home may be directed to ship the iron direct to Cocanada; there can be no difficulty about this, the quantity being so large, viz., 500 tons. Transhipment at Madras or Calcutta adds some 20 or 25 per cent. at least to the cost of the iron in the shop.

3. As the Workshop Superintendent cannot rely on the Calcutta market for the regular supply of the several kinds of iron he requires, and as the iron obtained in this retail way, costs nearly double what it can be obtained for direct from England, I have the honor to request you to take measures for expediting the execution of the Indent.

No. 434. ORDER THEREON, 19th October 1865, No. 3,109.

ACCOUNT, No. 54.

1. Before transferring the Indents received with this letter to the Store Department, in order to the inclusion in the next annual Indent upon the Home Government of a sufficient quantity of iron of the several kinds required by Captain Ryves, the Government request to be furnished with a Statement showing the works on which the iron is to be used, and the quantities required for each.

2. The cost of the iron must be included in, and be met from the allotments to be made in the ensuing year's Budget for the several works to which the material is to be appropriated.
