Proceedings of the Madras Government, Public Works Department, 30th October 1865.

No. 738. Read the following letter from the Acting Deputy Consulting Engineer for Railways, in charge, to the Secretary to Government, Public Works Department, dated Madras, 17th October 1865, No. 508 :—

1. In Order of the 19th April last, No. 240, His Excellency the Governor in Council approved of the proposed arrangements of the Stations to be established near the Fort at Trichinopoly on the Errode Extension of the Great Southern of India Railway, and authorized the Agent to indent on the Railway Board of Directors for 700 feet of corrugated zinc, required for covering the Station house and the Passengers and Goods' sheds.

2. The detailed plans of the several buildings have been since sent in, and I have now the honor to lay before Government the correspondence which has passed regarding them, between Colonel Anderson and the Railway authorities.

From Agent, No. 1,795, 6th September 1865, with one Enclosure.
To do. No.* 365, 20th do.
From do. ,, 1,834, 11th October 1865, with one Enclosure.

3. Colonel Anderson took exception to the design of the roof, which makes a gutter on the wall of the Station house. He pointed out the defects of a similar description of roof at the Bangalore Station, and suggested that a terraced roof be adopted for the Station.

4. The Chief Engineer of the Railway, however, from his experience of buildings erected at Negapatam, considers that the proposed zinc roofing will answer ; and states the various methods he proposes adopting to render the gutter water-tight.

5. The gutter on the wall will perhaps leak, as suggested by Colonel Anderson. The spans being all short, a terraced roof might easily be constructed. It would render the rooms less noisy during rain, and cooler in hot weather than the iron roof; but as the roof and trusses have been ordered from England, perhaps Government would prefer to sanction the construction of the Station as proposed by the Chief Engineer.

6. Colonel Anderson does not consider it necessary that the Trichinopoly station should be defended, and I request, therefore, that you will be pleased* to obtain the sanction of Government to the detailed plans now submitted.

Nos. 119, 163, 164, and 165.

No. 739. ORDER THEREON, 30th October 1865, No. 3,259.

RAILWAY, No. 59.

The Governor in Council sanctions the construction of the Railway Station near the Fort at Trichinopoly, on the Errode Extension of the Great Southern Line, in accordance with the plan proposed by the Chief Engineer of the Company.

(True Extract.)

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

To the Consulting Engineer for Railways, with 9 Enclosures.
