G.O. No. <u>131</u>	Press Mis.
Dated <u>18</u>	

Not to be folded or roughly handled

17

*Proceedings of the Madras Government, Public Works Department,
27th March 1865.*

No 542. Read the following letter from Lieutenant-Colonel J. C. ANDERSON, R. E.,
Superintending Engineer, 2nd Division, to Colonel C. A. ORR, R. E., Secretary to
Government, Department Public Works, dated Masulipatam, 14th January 1865,
No. 125.—

SIR,

1. I have the honor to submit for sanction an estimate amounting to Rupees 9,700, which
has been prepared by Mr. Sage and Captain Winscome, R. E., for constructing an additional set
of shutters for the head sluice to the Bezoarah main channel.

2. The proposed shutters are designed to serve as a precaution against accidents. Brush-
wood accumulates to such an extent in front of the vents, that it is found impossible to close the
present shutters so effectually as to control the supply during high fashes, and though no
accident has up to this time occurred, there cannot be any security from a serious inundation
without additional means of regulation.

3. The main channel at Seetanagram can with safety carry a much larger supply than that
at Bezoarah, and although it is desirable that the head sluice there should also be furnished with
a second set of shutters, their construction may advantageously be postponed until the working
of those for the Bezoarah sluice shall have been fully tested.

No. 543. ORDER THEREON, 27th March 1865, No. 834.

1. The Government approve of the plan and estimate amounting to Rupees 9,700, submitted
with the foregoing letter, for strengthening the head sluice of the Kistna anicut main channel at
Bezoarah, and fitting an additional set of shutters to each vent.

2. The Superintending Engineer, 2nd Division, will report after the 1st May next, from
what source the cost of the work can be met, or submit an application for a grant from the
Reserve.

(True Extract)

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

Sir

I have the honor to
submit for sanction an Estimate
amounting to Rs 9,700. which has
been prepared by ^{Mr Sage} Captain Muscove
for constructing an additional
set of shutters for the head sluice
to the Bagaroh Main Channel.
2- The proposed shutter is
designed to serve as a precaution
against accidents. Drushoor
accumulates to such an extent
in front of the vents, that is found
impossible to close the present
shutters

shutters so effectually as to
control the supply during high
floods, and though no accident
has up to this time occurred, there
cannot be any security from a
serious inundation without
additional means of regulation.

3. The Main Channel at Sectu-
-magram can with safety carry
a much larger supply than that
at Dayanah, and although
it is desirable that the head sluice
there should also be furnished
with a second set of shutters, their
construction may advantageously
be postponed until the working
of those for the Dayanah sluice
shall have been fully tested.

I have the honor to be
Sir
Your most Obedt. Servt.
