Government of Madras.

Public Works DEPARTMENT.

G.O. No. 1815	Press
178-179.	Mis.
Dated 9 - 6	18 66.

Not to be folded or roughly handled

9th June 1866

No. 178. Read the following letter from the Officiating Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 30th May 1866, No. 346 :—

- 1 Abstract Estimate.
- 1 Survey
- 1 Ayacut Statement.
- 1 Letter No. 506, dated 14th October 1865.

1. I have the honor to submit, for the sanction of Government, out of the Reserve "Agricultural" an estimate of Rupees 2,700 for restoring and improving the old native channel leading from

the Peroomalcoopum tank (across the gorge of the Mymundalum valley) to the Vellymullay tank in the Chittoor Range, North Arcot District.

2. The Mymundalum Peria Yary, Mymundalum Chinna Yary, and Peroomalcoopum Yary, which are three moderately sized tanks situated across the Mymundalum valley, are supplied by the surface drainage of the latter; but in consequence of the ground being much broken, the supply is greater than it otherwise would be, and is in excess of the requirements of the tanks alluded to. The surplus water, therefore, which is stated to be large in quantity, finds its way through the Kalin-gulah of the Peromalcoopum tank into the Poiney western channel $1\frac{1}{2}$ mile distant, but in its passage it causes much damage to the latter, the embankments of which are not high enough to resist the water, and cannot be raised, as the valuable land on the bank of the channel in the upper side would be flooded thereby.

3. It is proposed, therefore, to convey this water by the projected channel to the Vellymullay tank, which is at present very insufficiently supplied by the drainage of the eastern face of the sacred Vellymullay hill.

4. The project was matured by Captain Chrystie while in charge of Chittoor Range, and is strongly recommended by that Officer, whose letter on the subject is enclosed.

5. The Collector of North Arcot in returning the estimate with his counter-signature writes:—"I know this tank well, and think it highly desirable that so fine a specimen of old native work should be utilized to the fullest extent of its capabilities."

6. The accompanying Ayacut Statement will show that a revenue of Rs. 622 may be expected from the proposed work.

No. 179. ORDER THEREON, 9th June 1866, No. 1,815.

CIVIL WORKS, No. 32.

1. The Government sanction the estimate of Rupees 2,700 for the restoration and improvement of the old

native channel leading from the Peroomalcoopum tank, across the gorge of the Mymundalum valley, to the Vellymullay tank in the Chittoor Range of the North Arcot District.

2. The question of allotting funds for this work will be considered when the applications of Superintending Engineers for grants for incomplete and other works come under review.

Superintending Engineer's
Office 4th Division
Madras 30th May 1866

From

Captain J. Goddard R.E.
Offg Superintending Engineer
4th Division

To,

Colonel C. A. Orr R.E.
Secretary to Government P.W.D.

Sir,

I have the honor to submit

enclosed:

1 Abstract Estimate

1 Survey

1 Abstract Estimate = 2700 for restoring and improving the old Native

1 Letter No 506

3/11/66

For the sanction of Government out of the Reserve "Agricultural" an estimate of Rupees 2700 for restoring and improving the old Native Channel leading from the Perumalampum Tank (across the Gorge of the Mymundalum valley) to the Vellaymullay Tank on the Chittoor Range North Arcot District

The Mymundalum Peria Gary, Mymundalum Chinnai Gary, and Perumalampum Gary, which are three moderately sized Tanks situated across the Mymundalum valley are supplied

supplied by the surface drainage of the latter;
but in consequence of the ground being much
broken the supply is greater than it otherwise
would be, and is in excess of the requirements
of the Tanks alluded to. The surplus water there-
fore which is stated to be large in quantity
finds its way through the Kalingulak of the
Perumalappan Tank into the Vinnay Western
Channel $1\frac{1}{2}$ mile distant, but in its passage
it causes much damage to the latter, the em-
bankments of which are not high enough to
resist the water, and cannot be raised, so
the valuable land on the bank of the Channel
in the upper side would be flooded there by.

It is proposed therefore to convey
this water by the projected Channel to the
Vellymullath Tank which is at present very
insufficiently supplied by the drainage of
the Eastern Face of the sacred Vellymullath Hill.
The project was originated by Captain
Chrysie while in charge of Chittoor District and
is strongly recommended by that Officer, whose
letter on the subject is enclosed.

The Collector of North Arcot in
returning the estimate with his countersignature
writes - "I know this Tank well, and
think it highly desirable that so fine a
specimen of old native work should be
utilized."

utilized to the fullest extent of its capabilities.
The accompanying Account Statement
will show that a revenue of Rs 622 may
be expected from the proposed work.

I have the honor to be
Sir

Your most Obedt Servant
J. Gordon Captain R.E.
