MADRAS RECORD OFFICE.

Government of Madras.

Public works DEPARTMENT.

G.O. No. 1829	Press Mis.
215-216	
Dated 11-6-	1868.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
11th June, 1866.*

No. 215. Read the following letter from the Officiating Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 31st May 1866, No. 364 :—

1. With reference to Government Order, dated 1st March 1866, No. 696,

I have the honor to enclose the opinions recorded by the Superintending Engineer, and the Barrack Master.

1 Letter from Barrack Master, No. 128, dated 1st May 1866

1 Memorandum of the Officiating Superintending Engineer, No. 309, dated 28th May 1866.

2. The Municipal Commissioners are suggested by the Barrack Master as

a most appropriate Department to conduct the experiment, as recommended by the two functionaries abovenamed.

3. The Barrack Master has seen the lamp lighted, and has had some opportunity of judging of its powers, but not fairly judging.

From the Barrack Master, Presidency, to the Superintending Engineer, 4th Division, dated Fort Saint George, 19th May 1866, No. 128.

1 With reference to Proceedings of Government, Public Works Department, No. 696, dated 1st March 1866, I have the honor to suggest that a more appropriate site than the Barrack yard may be selected for the "Pharos light." Should the light be really such as we are led to anticipate, the circle of illumination will be broken by the opposite walls in the narrower breadth of the quadrangle, and there will thus be a waste of light in reference to the area.

2 The light seems better adapted for the centre of four cross roads, or for the Pier near the Custom-house.

Memorandum from the Officiating Superintending Engineer, 4th Division, to the Barrack Master, Presidency, dated 28th May 1866, No. 309.

Letter No 128 dated 19th May 1866

Intimates that the Superintending Engineer concurs in the selection of the sites for putting up the Pharos lamp.

No. 216. ORDER THEREON, 11th June 1866, No. 1,829.

CIVIL WORKS, No. 35.

It does not appear from these papers that the lamp has been tested in the manner suggested in G. O. No. 696, dated

1st March 1866. The Barrack Master and the Superintending Engineer are of opinion that it would be preferable to erect it on a more suitable site than the Barrack square at Fort Saint George. The Government, however, desire that it should be set up as directed within the Barrack square in such a position as will enable the garrison staff and the public generally to form an opinion of its illuminating power. After giving it a fair trial, the Superintending Engineer will in communication with Colonel Worster furnish the report called for in the Order above quoted.

To,

Colonel L. A. Orr R.E.
Secretary to Government C.M.D.
Fort Saint George

Sir,

With reference to Government Order
dated 1st March 1866 No 696 I have the honor to
enclose the opinions recorded by the Superintending
Engineer, and the Barrack Master.

The Municipal Commissioners
are suggested by the Barrack Master as a
most appropriate Department to conduct the
experiment as recommended by the two
functionaries above named.

3 The Barrack Master has seen
the lamp lighted and has had some oppor-
tunity of judging of its powers but not
fairly judging.

ADIDAS GOVERNMENT
under date the 11th June 1866.

Read the following

From
the Superintending Engineer
of the 4th Division

(Here enter No. 364 dated 31st May, 1866)

It does not appear from these papers that the Lamp has been tested in the manner suggested in G. O. No 696 of 1st March 1866. The Barrack Master & the Engineer are of opinion that it would be preferable to erect it on a more suitable site than the Barrack square at Fort St George. The Government however desire that it should be set up as directed within the Barrack square in such a position as will enable the Garrison Staff & the public generally to form an opinion.
