*Proceedings of the Madras Government, Financial Department,  
14th August 1866.*

No. 27. Read the following letter from the Secretary to the Government of India, to the Accountant General, Bombay; dated Simla, 21st July 1866, No. 1476.

In reply to your letter, dated 30th June 1866, I am directed to state that, when an Uncovenanted Servant obtains leave under the rules promulgated in Financial Notification, dated 13th April 1864, his pension is computed upon the full pay of the substantive appointments held by him during the five years preceding his retirement, notwithstanding that his periods of absence during those five years are excluded from the calculation of the period qualifying for pension. But the period of absence on private affairs on leave without pay, must be thrown out from the monthly average of the five years' pay upon which pension is computed, the intention in Financial Resolution, No. 542, dated 4th June 1864, being that such periods of absence should in no way contribute to claims to pension.

Ordered that the foregoing letter be communicated to the several Secretariats, to the various Local Governments and Administrations, the Comptroller General of Accounts, and the Local Officers of Account in the Civil Department.

(Signed) J. E. COOKE,  
*Asst. Secy. to the Govt. of India.*

No. 28. ORDER THEREON, 14th August 1866, No. 302.  
Communicated to the several Departments of the Secretariat and to the Accountant General.  
(True Extract).

*G. J. Cunningham*  
Chief Secretary.

To the Public Department.  
" Revenue do.  
" Public Works do. ✓  
" Military do.  
" Civil Pension do.  
" Accountant General.

Exd. T. Cartledge.

6  
The first of these is the  
fact that the number of  
cases of the disease has  
increased in the last few  
years. This is due to the  
fact that the disease is  
now more common in the  
tropics and is spreading  
to other parts of the world.  
The second fact is that the  
disease is now more severe  
than it was in the past.  
This is due to the fact that  
the disease is now more  
common in the tropics and  
is spreading to other parts  
of the world.
