*Proceedings of the Madras Government, Public Works Department,
29th August 1866.*

No. 649. Read the following Endorsement of the Officiating Superintending Engineer, 4th Division, dated Madras, 24th August 1866, No. 1,764 :—

Read the following letter from the Executive Engineer, Presidency, Southern Range, to the Officiating Superintending Engineer, 4th Division, dated Madras, 23rd August 1866, No. 268.

In reply to your Memorandum No. 1,738, under date 23rd August 1866, I have the honor to observe that it is always difficult to calculate the exact time that will be required to complete a large building; with regard to the Bakery, the following special reasons may be assigned for our not being able to complete it much before the end of October :—

1st. Delay in obtaining fire-bricks from the School of Arts, this prevented our building the flues, and consequently the main walls above the flues.

2nd. There has been a difficulty in obtaining corrugated iron for the roof of the size and quality that we required.

3rd. An alteration in the trusses of the roof was rendered necessary as the slope given in the original plan was insufficient; you will remember that I personally pointed out this defect to you.

Submitted to Government, Public Works Department, with reference to their Order, No. 2,562, dated 15th August 1866.
