Dated 18

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department, 15th September 1866.

Read the following letters :—

No. 390. From the Superintending Engineer, 1st Division, to the Secretary to Government, Public Works Department, dated Camp, Dowlaishweram, 21st July 1866, No. 66.

1. With reference to your Memorandum, dated 13th instant, reminding me of the call* for a report on the method of checking the issue of stationery to the subordinate of the Department Public Works, I beg to explain that I overlooked that portion of the G. O., understanding only that it directed the adoption of the method in force in the Public Works Department.

* G. O. No. 1,195, 18th April 1866.

2. I now have the honor to report that the issue of stationery is intrusted to the Store-keeper. Indents from Ranges are examined by him, and submitted to me for countersignature, after he has checked the entry of last supply and balance in hand. The Store-keeper is required to bring specially to notice, any Indent in which the expenditure or demand for stationery in any subordinate office exceeds the recognized average requirements.

3. I do not know whether the averages fixed for the several offices are not more than they might be kept down to.

No. 391. From the Superintending Engineer, 2nd Division, to the Secretary to Government, Department Public Works, dated Masulipatam, 20th June 1866, No. 23.

1. Agreeably to paragraph 2 of G. O. No. 1,195, dated 18th April 1866, I have the honor to report on the distribution of the stationery sent to this Division during the current year.

2. The Range Offices, as well as that of the Superintending Engineer, having been remodelled during the past year, it has been necessary to settle what proportion of stationery should be allotted to each and after a careful enquiry. I have fixed the various articles needed, according to the number of the Writers and the general work of each office, as per Tabular Statement annexed, and hope both economy and efficiency will be ensured.

No. 392. From the Officiating Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 25th August 1866, No. 1,808.

Indents for Stationery from the Range Officers of the 4th Division, for 1865-66.

1. In obedience to the instructions conveyed in the Orders of Government, Public Works Department, No. 2,538, dated 11th August 1866, I have the honor to submit the papers noted in the margin, which will show the check provided in this office in connextion with the Indents for stationery from the year 1863-64.

2. The practice has been simply to reduce or altogether disallow such articles of stationery included in the local annual Indents, as appeared to be either unnecessarily large or unusual as a supply, the Indents beingthen forwarded to the Superintendent of Stationery for compliance. The articles when received in this

Subordin

office were despatched to the indenting Officers, who rendered no accounts beyond showing in their next annual Indent, the expenditure of the previous year. There has consequently been no formal correspondence or proceedings on the subject, the only papers being a few references between this and the Executive Offices, and the Stationery Office, on purely routine matters.

3. As stated in my letter of the 7th August 1866, No. 1,155, I shall follow the plan adopted by the Board of Revenue, in regard to the Indents which will be received shortly.

No. 393. From the Superintending Engineer, 5th Division, to the Secretary to Government, Department Public Works, dated Cuddalore 16th July 1866, No. 72.

1. With reference to paragraph 2, of G. O. of the 18th April 1866, No. 1,195, and your Memorandum No. 240, of the 13th instant, I have the honor to state that the Indents of the Range Officers for pencils, quills, &c., articles specified in the Notification of the Inspector General of Ordnance and Magazines, published in the "Fort Saint George Gazettte" of the 3rd July 1860, page 8, were checked in this office with reference to the quantity prescribed for each person, and any article applied for in excess was struck out in this office, and a similar reduction made in the General Indent for the Division.

2. As regards papers, books, &c., other than those mentioned in the Notification above referred to, the Range Indents were checked with reference to the quantity consumed during the previous years, and any excess applied for was similarly reduced in this office. In fact nothing more than what was deemed actually necessary was provided for in the general Indent.

3. Since the submission of my Indent for the current official year, several forms of accounts having been supplied to the Ranges by the Controller of Public Works Accounts, I have issued to the Range Officers a Circular directing them as to exercise strict economy in the consumption of the articles supplied to them, and to report what quantity of papers they can save from the current year's supply.

4. I did not deem it necessary to intimate to the Range Officers the retrenchments made in my office, and consequently I could not furnish the Government with copies of my proceedings on the Range Indents.

No. 394. From the Superintending Engineer, 6th Division, to the Secretary to Government, Department Public Works, dated Lower Anicut, 23rd July 1866, No. 467.

1. With reference to G. O., No. 1,195, dated 18th April, I have the honor to inform you that the Indents of the Range Officers are checked in this office before they are passed, and any items applied for in excess of the actual requirements are disallowed.

2. Range Officers have hitherto purchased Goa and country paper in the local bazaars, this has now been put a stop to under the G. O. under reply, and an allotment of these papers has been made to the several Ranges according to their actual requirements, or as nearly so as can be judged.

3. In the Quarterly Indents the supply used during the previous quarter is shown. The expenditure of stationery in the various Ranges has not hitherto been sufficiently compared, and a check thus established. A tabulated Statement is now to be kept by which the expenditure of stationery may be easily compared and checked, and some accurate idea of the quantities of the various papers required in each Range will shortly be ascertained.

4. The Range Officers have been furnished with a list of the various documents they are required to submit, in which the paper on which the documents are to be prepared is mentioned, and they have been called upon to keep a record of the stationery issued to their Subordinates and office establishments, to strike a balance at the end of each month, and to furnish this office with a copy of this balance sheet showing an abstract of the issues to each Subordinate or Office.

No. 395. From the Superintending Engineer, 7th Division, to the Secretary to Government, Department Public Works, dated Camp, Coonoor, 20th July 1866, No. 90.

Enclosure 1.

I have the honor to report with reference to G. O., No. 23 of 8th May, and your reminder No. 240, of 13th July, on the subject of paragraph 10 of G. O. in the Public Department, No. 331 of 30th March 1866, that I have not had occasion to issue any Circular relating to the supply of stationery to offices subordinate to mine. Range Officers' Indents are dealt with, as received, on their individual merits, a first supply being issued, in proportion to their presumed wants, on first receipt of the divisional supply from Madras; with reference to which I take this opportunity of calling attention to non-compliance with my Indents to a considerable but unexplained extent, as shown in the accompanying statement. One article named therein, tracing cloth, I have lately been supplied with from the Public Works Stores.

No. 396. From the Officiating Superintending Engineer, 8th Division, to the Secretary to Government, Department Public Works, dated Madura, 23rd May 1866, No. 169.

1. With reference to G. O., No. 1,195 of the 18th April, I have the honor to state, that it has been customary in this Division for Range Officers to procure the Goa or French paper in the local markets; as this practice is now objected to, a supplemental Indent must be sent to the Stationery Department for a further supply of this class of paper for the current year.

2. As to the proceedings carried out in checking the issues to subordinate offices, quarterly Indents are sent in by the Range Officers, showing the amount of the last supply, the balance in hand, and the requirements. The figures are examined in my office, and only a fair average supply is issued.

3. The annual Indent for stationery for the Division is prepared in this office; the quantities of each article being calculated from the average expenditure of each office establishment, a check is thus instituted on the requirements for the coming year, and afterwards kept up in each quarter of the year; there is thus not much likelihood of an excessive demand being made for any of the items of the stationery list.

Proceedings of the Madras Government, Public Works Department, 15th September 1866.

No. 397. From the Superintending Engineer, 3rd Division, to the Secretary to Government, Public Works Department, dated Bellary, 3rd September 1866, No. 1,593.

1. With reference to G. O., No. 1,195, dated 18th April 1866, I have the honor to inform you that the system of docket slips has been introduced throughout this Division, and instructions have been issued to Range Officers to limit the use of Foolscap paper to such documents as have to be sent to your office.

2. The issue of pencils, pens, &c., is regulated by the scale laid down in "Fort Saint George Gazette," with slight modifications, according to the amount of work in each Range.

3. I am having all the different forms printed, and have already distributed a considerable number to the Ranges, and am endeavouring to reduce the office work to a minimum.

4. The only articles at present allowed to be purchased and charged for in the contingent bills are entered in the margin;* provision will, however, be made in my future stationery Indent for the last mentioned article.

* File books.
Vinegar.
Gum.
Flour for paste.
Other petty articles.
