Dated 2—10— 1886.

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department, 2nd October 1866.

No. 45. Read the following letter from the Superintending Engineer, 5th Division, to the Secretary to Government, Department Public Works, dated Salem, 19th September 1866, No. 105 :—

1. With reference to the Order of Government of the 19th September 1865, No. 2,761, I have the honor to state, that while at Bangalore last month I addressed the President of the Municipal Board on the subject of the Main Sewer. I suggested that, in the event of the Board taking entire charge of the works connected with the sewer, an annual grant of one thousand Rupees from Government would be a sufficient contribution towards the cost of establishment and repairs. The cost of the present establishment is Rupees 55 monthly, or Rupees 660 a year.

1 Extract from Proceedings of the Municipal Board.

2. The Board have expressed their willingness to take charge of the works, but consider that as the present establishment is insufficient, the annual grant should be twelve hundred Rupees, of which sum 960 Rupees will, according to their estimate, be required for establishment.

3. As there is no doubt that on account of the extension of the works the establishment will have to be increased, I beg to recommend that the Board's offer be accepted, on the understanding that no addition be made to the grant on account of ordinary repairs.

EXTRACT.

Proposition of the Madras Government regarding Main Sewerage.

12. Read letter from the Superintending Engineer, 5th Division, No. 87, of 4th August 1866, proposing, on behalf of the Madras Government, that 1,000, Rupees per annum should be placed at the disposal of the Municipal Board for establishment (now 660 Rupees a year) and for repairs, and that the Board should take charge of the work on these terms.

Resolution.—The Board are unanimous in their opinion that the present establishment, amounting to a yearly outlay of 660 Rupees, is insufficient ; and that one hundred Rupees a month is quite necessary, viz., 80 Rupees for actual establishment, and the balance, viz., Rupees 20 a month, for any quite ordinary repairs and up-keep ; and that all extraordinary repairs or alterations should be met in an extraordinary way.

They are of opinion that a double management is certainly not advisable, and are willing to take charge as alone.

Ordered to be communicated to the Superintending Engineer in reply to his letter on the subject.

No. 46. Order thereon, 2nd October 1866, No. 3,130.

CIVIL WORKS, No. 15.

No. 1,907, dated 7th July 1865.

1. In their Orders marginally noted, the Government observed that they would not object to the custody and control of the reservoir below Miller's tank at Bangalore being vested

in the Municipal Board, of which the Executive Engineer at that station and the Deputy Assistant Quarter Master General of the Division were to be Members. Shortly afterwards the Superintending Engineer of the 5th Division was requested,* in reply to a reference which he had made on the subject, to state whether the Municipal authorities were willing to take over the entire management of the whole of the works connected with the Main Sewer which extends from Miller's tank to the Dummaloor tank, and if so, upon what terms.

* In G. O. No. 2,761, dated 19th September 1865.

2. From the papers above read, it appears that the Board are willing to undertake the charge provided they are allowed an annual grant of 1,200 Rupees, of which Rupees 960, or Rupees 300 in excess of the existing allotment, will be for the establishment which is maintained for conservancy. This arrangement Colonel Foord supports, and, in accordance with that Officer's recommendation, the Government sanction its adoption on the distinct understanding that no addition will be made to the grant for ordinary repairs.

3. The increased grant now sanctioned will have effect from the 1st April next, and provision should be made for the charge in the Divisional Budget for the ensuing year.
