No. 91. Read the following letter from the Superintending Engineer, 3rd Division, to the Secretary to Government, Public Works Department, dated Bellary, 20th October 1866, No. 2,250:—

In forwarding the accompanying Statements, I have the honor to point out that in the last column the sums required in some cases exceed the amount sanctioned, but I have made provision for these excesses. For instance, the sum allotted in G. O. No. 1,919 of 20th June 1866 for the school-room for the Artillery was Rupees 231, but the expenditure during this year to complete it has been Rupees 327: the revised estimate sanctioned in G. O. No. 2,357, of 26th July 1866, has not been exceeded, but the excess over grant is covered by a saving on the following work.

From the estimate of the bridge over Bunhooppa nullah, I have made a deduction of Rupees 784, on account of the portion to be given up, as it is calculated that we can only spend Rupees 2,296 by the end of March, I would beg to point out that this is one of the works entered in the Statement forwarded by me on the 15th instant.

It is optional with Major Moberly to make up the ten per cent. from the *Budget* works last mentioned, or from the *Reserve* allotments for other Military works.
