Public Works DEPARTMENT.

G.O. No. 3804	Press
602-1-1-3	Mis.
Dated 29-11-1866.	

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
29th November 1866.*

No. 642. Read the following letter from the Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 23rd November 1866, No. 3,294 :—

1. I have the honor to enclose, for the sanction of Government, an estimate amounting to Rupees 7,370 for constructing a rough stone revetment to the banks of the Bungaroo channel, or Cooum river head, in No. 1 Range, Madras District.
1 Abstract Estimate.
2. In consequence of the banks of this channel being all of sand, constant trouble is experienced with breaches, which not only entail an expense for repairs, but also of course largely diminish the supply of water going down to the Chembrambaukum and other tanks fed by the Cooum river. It is, therefore, necessary that the worst portions of the bank should be revetted with stone, and the estimate now forwarded provides for doing this. Portions which were thus revetted some years ago have not breached.
3. As the work is urgently needed, I would be glad if the Government could give immediate sanction to the estimate.
4. The Collector of Madras has countersigned the estimate in token of approval.

No. 643. ORDER THEREON, 29th November 1866, No. 3,804.

CIVIL WORKS, No. 134. The Government approve of the estimate of Rupees 7,370 which is submitted with this letter for strengthening and revetting with stone the breached portion of the banks of the Bungaroo channel in the Madras District, but as no funds are now available for appropriation to the work provision will be made for it in the outgoing Budget.

Secretary to Government P. W.

Sir,

I have the honor to enclose for the sanction of Government an Estimate amounting to Rs 7370 for constructing a rough stone revetment to the banks of the Bengaroor Channel or Coom River Head, in No 1 Range Madras District.

2. In consequence of the banks of this Channel being all of sand, constant trouble is experienced with breaches which not only entail an expense for repairs, but also of course largely diminishes the supply of water going down to the plembraubam - Kunn and other tanks fed by the Coom River. It is therefore necessary that the worst portions of the bank should be revetted with stone, and the Estimate now forwarded provides for doing this. Portions which were thus revetted some years.
