Dated 1-12-	1866.

Not to be folded or roughly handled

1 -

*Proceedings of the Madras Government, Public Works Department,
1st December 1866.*

Read the following papers :—

No. 7. From the Officiating Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 18th June 1866, No. 646.

Constructing twelve yards new calingulah and four sluices for the Villambakum tank	RS. 1,210	1. I have the honor to submit for sanction three estimates as per margin, for certain new works of irrigation in Trivellore Taluq, Madras District, and to state that they have all been approved of by the Collector, also has recommended that they should be carried out during the current year in connection with certain repair estimates for these tanks, which have been sanctioned by me for execution.
Putting a dam at the head of the stream which during the monsoon separates the two portions of the village of Kotahcooppum	690	
Re-constructing thirty yards sluice to Sunthavaloor tank... ..	530	
	<u>2,430</u>	

2. I beg to recommend, therefore, that the aggregate amount of the three estimates, viz., Rupees 2,430, may be granted from the Reserve Fund under the head "Agricultural."

No. 8. Endorsement of the Superintending Engineer, 4th Division, dated Madras, 16th November 1866, No. 3,144.
From the Acting Collector of Madras, to the Superintending Engineer, 4th Division, dated Sydapet, 12th November 1866, No. 241.

1. With reference to your letter of the 19th October last, No. 2,703, requesting me to furnish you with particulars of Ayacut, Revenue, &c., of certain irrigation works, I have the honor to send you a Statement showing the required particulars for two of the works as shown by the records in my Office.

2. The object of the dam at the head of the stream at Kotahcooppum is not to increase the area of cultivation, but to prevent the water in the channel overflowing and entering the village, and injuring the houses, as it does at present, during the monsoon.

Submitted to Government with reference to their Endorsement dated 20th June 1866.
(Signed) A. J. M. BOILEAU, Colonel, R. E.,
Superintending Engineer, 4th Division.

- 1 Letter No. 646, dated 18th June 1866.
3 Abstracts.
2 Statements.

No. 9. ORDER THEREON, 1st December 1866, No. 3,827.

CIVIL WORKS, No. 3.

1. With his letter of the 18th June last the Officiating Superintending Engineer of the 4th Division submitted the following estimates :—

Construction of a new calingulah and sluices to the Villambakum tank	RS. 1,210
Re-construction of the Sunthavaloor tank sluice	530
Dam at the head of a stream at Kotahcooppum	690

*Proceedings of the Madras Government, Public Works Department,
1st December 1866.*

2. From the Statements furnished by the Collector in his letter above read, it does not appear that any increase of cultivation is expected from the works proposed to be carried out, nor does it seem that they are necessary for the security of the existing revenue. The amount* proposed to be expended in the repair of the Sunthavaloor tank during the current year is more than double the aggregate assessment† of the tank for the last five years. In the same way the improvements recommended to the Villambakum tank will raise the proposed outlay on that work to Rupees 2,034 or to nearly eight times the highest revenue, which it is observed has reached in the same period only Rupees 270. The returns do not show that the outlay proposed on either tank would be justifiable.

* Rupees 4,620.

† Rupees $404 \times 5 = 2,020$.

3. The object of the dam at the head of the stream at Kotahcooppum is stated to be "to prevent the water in the channel overflowing and entering the village, and injuring the houses." As this would therefore appear to be a municipal work, the Government consider that the people should be required to execute it themselves.

(True Extract.)

Colonel, R. E.,
Secretary to Government.

To the Superintending Engineer, 4th Division, with five Enclosures.
