Proceedings of the Madras Government, Public Works Department, 22nd March 1866.

No. 473. Read the following letter from the Superintending Engineer, 3rd Division, to the Secretary to Government, Public Works Department, dated Bellary, 8th March 1866, No. 229:—

I have the honor to forward herewith four Statements of Savings and additional Demands with the works in progress in this Division, agreeably to instructions contained in G. O. No. 1,708, dated 20th June last.

No. 474. ORDER THEREON, 22nd March 1866, No. 926.

ACCOUNT, No. 54.

1. The letter above recorded gives cover to Statements of New Works and Repairs in the 3rd Division, the allotments for which are not likely to be expended by the 30th April next, and of those for which additional funds are required during the current official year.

2. On examining these returns, the Government are greatly surprised to find that the estimated expenditure up to 30th April next on the undermentioned Military works at Bellary is likely to fall far short of their allotments.

Works.	Estimate.	Allotment.	Estimated expenditure up to 30th April 1866.
	RS.	RS.	RS.
School-room and place of worship.	18,950	8,998	1,414

Rifle Ranges	4,500	4,500	3,493
Improving the drainage of the European Barracks ...	.....	10,000	7,934

3. Seeing that the grants for most of these works were sanctioned during the early part of the year, and that the necessity for utilizing all available funds, and especially those assigned to Military works, has been repeatedly and forcibly pressed upon the attention of the local Officers, the Government consider that the short outlay under notice is creditable neither to the Superintending Engineer nor to the Range Officer concerned, as, with their head quarters at Bellary, these Officers have had every facility for pushing on the progress of the works at that station, and of laying out, with advantage, even a larger allotment than was placed at their disposal. Major Moberly's attention will be drawn to the remarks in the Quarter Master General's endorsement, No. 2,952,* dated 16th instant, and he will be requested to explain fully the circumstances which have tended to retard the progress of Military works at Bellary. With reference to the advance of Rupees 25,000 which, it appears, has been made during the current year on account of timber required for some of these works, the Superintending Engineer will furnish a statement, *in detail*, of *all* outstanding advances in the Bellary District, and he will report when, by whom, and under what circumstances they were made, and how he proposes to adjust them.

* Separately referred for the Superintending Engineer's report.

4. The amount which is shown to be available for transfer in the Statements under review is Rupees 37,158, as follows:—

From the Supg Engineer of the 3rd Dn.
(H. E. No 229, d/. 8th March 1866)

The letter above recorded gives cover to 4 statements of New Works and Repairs in the 3rd Dn, the allotments for which are not likely to be expended by the 30th April next, and of those for which addl. funds are required during the current offl. year.

On examining these Returns, the Government are greatly surprised to find that the estimated expenditure up to 30 April next on the undermentioned Military works at Bellary is likely to fall far short of their allotments.
