239-240

Dated 10 — 1 — 1866.

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department,
10th January 1866.

No. 239. Read the following letter from the Director of Public Instruction, to the Chief Secretary to Government, Fort Saint George, dated Madras, 28th October 1865, No. 2,280:—

I have the honor to forward the papers marginally noted,* and to request that Government will be pleased to sanction Captain Beatty's revised estimate for the Vizagapatam Normal School, which exceeds the original estimate of 8,000 Rupees by Rupees 2,363. The extra cost can be met from the provision made in this year's Budget for the erection of a Zillah School-house at Berhampore, and which has already been placed at the disposal of the Public Works Department.

* Letter from the Inspector of Schools, 1st Division, No. 267 of 21st October 1865.
Do. from the Officiating Superintending Engineer, 1st Division, No. 1,281 of 12th October 1865, with estimate.
Requested to be returned.

From the Inspector of Schools, 1st Division, to the Director of Public Instruction, dated Masulipatam, 21st October 1865, No. 267.

1. I have the honor to forward a revised estimate for the erection of the Government Normal School at Vizagapatam, submitted by Captain Beatty, R. E., at present officiating Superintending Engineer, 1st Division.

2. Captain Beatty's own letter, copy of which accompanies this, fully explains the grounds on which it has been found necessary to revise the original estimate. The frequent transfers of charges which unavoidably take place among the Executive Officers of the Public Works Department, must, I think, be taken as one of the chief causes of the frequent occurrence of revised estimates. The work that is estimated for by one Officer, often falls to another to be completed; whose professional skill is in no danger of being questioned by reason of the excess.

3. Since my arrival at head quarters I have more than once visited the new school, and for the delay that has taken place, the present Executive Engineer can in no degree, so for as I can judge, be held responsible. The work has been at a stand still almost for sometime, waiting for the Sâl-wood rafters which arrived by steamer only a few days before I left Waltair last month.

4. I am not aware of any Government order for *cut-stone* to be used for flooring. Flooring in chunam has been prohibited, but flat tiles or smooth bricks might have been used. Now however the stone has been collected, and some portion has been laid down, so that any alteration in this point now would not, I think, be expedient; and there can be no doubt that the stone will look better and last longer.

5. The flight of steps referred to in paragraph 6 of Captain Beatty's letter, I decidedly think ought to be added.

6. With respect to paragraph 8, I have to observe that a plan and estimate for the Chicacole school has already been forwarded to you for sanction, and in the course of a few days more I hope to be able to send on plans and estimates for school houses at Bimlipatam and at Elur.

From the Officiating Superintending Engineer, 1st Division, to the Inspector of Schools, 1st Division, dated Waltair, 12th October 1865, No. 1,281.

1. I have the honor to forward you herewith the revised estimate of the Normal School at Vizagapatam, which has been prepared by the Executive Engineer, and examined in this Office.

Enclosure 1.

Capt. Beatty R.E.
Executive Engineer Vizagapatam

2. The original estimate was prepared in this Office in 1863, and framed on rates the sufficiency of which had not been tested by experience, as up to that date only one public building of any considerable size had been erected in the District by this Department: and in consequence during the past two years the necessity for greatly increased building rates has, in several instances been recognized by Government.

3. You will observe that the principal cause of excess is the very inadequate rates provided in the original estimate for roofing and flooring. The whole of the roofing timber is of Sál-wood, which is considered little, if at all, inferior to Teak, while its cost, when put up at Vizagapatam, is but little more than half that of Teak. The flooring, by an Order of Government of 1st February 1865, No. 289, is to be of cut-stone.

4. The building has been a considerable time under construction, owing to difficulties that have been met with in procuring Sál-wood for the roof. This has been obtained from Kimedy forests in Ganjam, sawn at the Aska factory, and sent down by sea from Gopalpore to Vizagapatam. However I understood from you that this delay has not hitherto been a source of any great inconvenience to the Educational Department as the Normal School Master and pupils have been accommodated in the buildings occupied by the *Zillah School*.*

* The Hindu A. V. School, Vizagapatam, is meant.
(Signed) H. BOWERS.

5. The well provided in the original estimate may, I consider, be dispensed with, as there are several wells in the neighbourhood of the building, and a tank immediately in rear of it.

6. One small additional work is proposed, viz., a flight of steps in rear from the level of the verandah floor down the steep slope of the tank bund on which the school is situated, to the waters of the tank. On your inspection of the building you considered, I think, that this would be an improvement.

7. The additional funds are now required to complete the roofing, flooring, and plastering, and if granted immediately the building may easily be completed and brought into use within this official year. The cut-stone flooring is the only part still to be done, which is likely to occupy much time.

8. I observe that Rupees 15,573 have been allotted in the Educational Building Fund Budget for new schools in this Division in this official year; and as the plans and estimates of these buildings have not yet received sanction, it is very improbable that the whole of this large sum can be advantageously expended on the new buildings before the close of the year. I would therefore suggest that the additional funds required for the Normal School be found by a reduction of the grants for the other new buildings of the Division, which can be made good to those estimates from the Budget of 1866-67.

9. With these remarks, I do myself the honor of requesting you will be good enough to forward the revised estimate for sanction, through the Director of Public Instruction.

(True Copy.)

(Signed) H. BOWERS,
Inspector of Schools.

No. 240. ORDER THEREON, 10th January 1866, No. 116.

CIVIL WORKS, No. 41.

1. In their orders in the Educational Department, under date the 30th September 1863, No. 243, the Government sanctioned an estimate amounting to Rupees 8,000 for the erection of a Normal School at Vizagapatam.

2. The Director of Public Instruction now submits a revised estimate, which has been prepared by the Executive Engineer at Vizagapatam. This estimate exceeds the amount already sanctioned by Rupees 2,363, and the Executive Engineer explains that the excess is due to the original estimate having been framed on rates, the sufficiency of which had not been tested by experience, as up to the date of its preparation (August 1863) only one public building of any size had been erected in the District by the Public Works Department. The items on which the largest excesses occur are *roofing*, *flooring*, and *contingencies*, for which Rupees 2591,771, and 1052 are provided in the revised estimate against Rupees 1177, 342, and 712 respectively in the estimate of 1863.

2. Under the explanation afforded, the Government sanction the revised estimate amounting to Rupees 10,363, and grant authority for the excess being provided from the Budget allotment for the Zillah School-house at Berhampore,* as recommended by the Director of Public Instruction.

* Ganjam District.
