Not to be folded or roughly handled

12

*Proceedings of the Madras Government, Public Works Department,
11th May 1867.*

No. 293. Read the following letter from the Officiating Superintending Engineer, 8th Division, to the Secretary to Government, Department Public Works, dated Kodikarnel, 25th April 1867, No. 162.—

1. I have the honor to submit, in accordance with paragraph 2 of Memorandum No. 65, dated 24th March 1866, lists of sluices and calingulahs that are much required in the Madura District, at an aggregate cost of Rupees 2,400, and in the Tinnevelly District Rupees 2,306.

2. The Budget allotment for Minor New Works, Agricultural, in each District, is Rupees 2,800, and this is quite insufficient to meet the requirements under this head. In the Meylur Talook of the Madura District there are a great many tanks which have no masonry works, either for the egress of water for cultivation, or for the discharge of surplus water, consequently the people make cuts in the bunds, and as in the past year, when violent rains fall, many tanks are breached. There has been much distress in the Meylur Talook in the last few months, and the Collector has been authorized to expend money for the relief of the people. The expenditure of Rupees 2,400 on small masonry works will be of much benefit, and I trust the Government will allow me the grant.

3. There is not an equal plea to urge for similar works in the Tinnevelly District, but they are also much required there. The estimates themselves are not submitted, as they are of the ordinary nature for minor works.

4. I have further to ask for a renewal of the grant for the current year of Rupees 500 from the same head, Agricultural, for the investigation of the Peiryaaur project in the Madura District, as was sanctioned for the past year in G. O. No. 921 of the 22nd March 1866.
