*Proceedings of the Madras Government, Public Works Department,
14th June 1867.*

No. 315. Read the following letter from the Superintending Engineer, 5th Division, to the Secretary to Government, Department Public Works, dated Cuddalore, 6th June 1867, No. 44:—

1 Plan.
1 Estimate.
1 Specification.

1. I have the honour to forward, for the sanction of Government, an estimate of Rupees 1,050, accompanied by a plan and specification, for constructing a

calingulah in the bank of the Wallajah channel near Karamboor, in the Cuddalore talook, South Arcot.

2. The channel is led from the Pooniar, and supplies the tanks of thirteen villages. The bank is constantly giving way at the place where it is proposed to build the calingulah, in consequence of the drainage of a large tract of country there falling into the channel. The only way to prevent the breaching of the bank and the consequent loss of water, will be to build a masonry work for the passage of surplus water.

3. If no funds are available from the Reserve "Agricultural," I request Government will be pleased to allow the work to be carried out from the allotment of the district. The revenue dependent on the channel is upwards of 6,000 Rupees.

No. 316. ORDER THEREON, 14th June 1867, No. 1,786.

IRRIGATION, No. 12.

The Government sanction the estimate of Rupees 1,050 submitted with this letter for the construction of a

calingulah in the bank of the Wallajah channel near Karamboor in the South Arcot District, and authorize the work to be proceeded with, its cost being met, later in the year, by transfers.

Remarks

Abstract Estimate No 1867-68.

South West District 1st Range East India Saltpetre

North - Constructing a battery in the Eastern corner of the Malabar Channel near Cannanore.

Against Cannanore 787 14 3 Repts. 5642 12 9 inc.

Five years average 670 11 11 6659 5 11

Eight years of 5 years 708 12 11 6859 13 10

Remarks - Although the 5 years average and the "highest of 5 years" both record the amount in value they do not do so in the amount of land cultivated. This may be the consequence of part of a 2nd crop having been raised. The bank on which it is now proposed to construct a battery was heavily breached last year & has been since repaired on former occasions. I think this very likely as the surface of the Malabar Channel is liable to the sea channel immediately above the site of the breach and at times with great violence. The battery is at this much needed.

1 Estimate

1 Specification.

I have the honor to forward, for the sanction of Government, an estimate of Rupees 1050, accompanied by a plan and specification, for constructing a calingulab in the bank of the Wallajah Channel near Karamboon in the Cuddalore taluk, South Arcot.

2. The channel is led from the Ponnai and supplies the tanks of thirteen villages. The bank is constantly giving way at the place where it is proposed to build the calingulab, in consequence of the drainage of a large tract of country then falling into the channel. The only way to prevent the breaching of the bank and the consequent loss of water will be to build a masonry work for the passage of surplus water.

3 If no funds are available from the
Reserve "Agricultural," I request Government
will be pleased to allow the work to be
carried out from the allotment of the
District. The revenue dependent on
the channel is upwards of 6000 rupees.
