*Proceedings of the Madras Government, Public Works Department,
21st June 1867*

No. 469. Read the following letter from the Consulting Engineer for Irrigation, and Canal Company, to the Secretary to Government, Public Works Department, dated Madras, 15th June 1867, No. 33.—

1 Plan
1 Estimate
1 Letter in original from Agent.

1. I have the honour to submit, for the consideration of Government, a letter, No. 116 of the 12th instant, from the Agent and Manager, Madras Irrigation and Canal Com-

pany, transmitting for sanction an estimate, Rupees 76, for constructing a bund across the main canal in the 45th mile.

2. The canal has cut off the supply of about 70 acres of land, which was under one of the small Nagatore tanks, and in consequence the Company have recently been called upon to pay compensation. It was no doubt intended to supply the lands in question from the canal, but this has not as yet been practicable. However by bunding the canal a considerable amount of water will be stored, as, above the point selected for the dam, the canal is single-banked, and the Chief Engineer hopes, during the current season, to supply not only the lands below the canal which were formerly irrigated from the tank, but also other lands. The sanction of the estimate under "Distribution" is therefore recommended.

No. 470. ORDER THEREON, 21st June 1867, No. 1,860.

IRRIGATION, No. 25.

The estimate is sanctioned, the outlay being entered under "Distribution" in accordance with the recommendation of the Consulting Engineer.

(True Extract.)

Consulting Engineer's Office,
Irrigation and Canal Co.
Madras 15th June 1867

From

Captain John Mullins R.E.

Consulting Engineer I. and C. Co.

To

Colonel C. F. Alcock R.E.

Secretary to Government P. W. R.

Sir,

I have the honor to submit for the consideration of Government a letter, No. 116, of the 12th Instant, from the Agent and Manager, Madras Irrigation and Canal Company, transmitting for sanction an Estimate, Rupees 76, for constructing a Bund across the Main Canal, in the 45th Mile.

2 The Canal has cut off the supply of about 70 acres of land which was under one of the small Nagatore Tanks, and in consequence the Company have recently been called upon to pay compensation. It was no doubt intended to supply the lands in question from the Canal, but this has not as yet been practicable. However by bunding the Canal a considerable amount of water will be stored, as above the point selected for the dam, the Canal is single banked and the Chief Engineer hopes during the current season to supply not only

only the lands below the Canal which were
 formerly irrigated from the Tank, but also
 other lands. The sanction of the estimate
 under "Distribution" is, therefore, recommended.

I have the honor to be,

Sir
 Your most obedient servant,

William Lewis, Captain (R.E.)

Consulting Engineer S.E.C.
