not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
5th July 1867.*

No. 125. Read the following letter from the Consulting Engineer for Irrigation and Canal Company, to the Secretary to Government, Department Public Works, dated Madras, 28th June 1867, No. 37 :—

1. With reference to the Order of Government of the 27th instant, No. 1,915, I have the honour to report that as no land has as yet been actually made over, or reported to this Office as made over, for the Madras Irrigation and Canal Company's works in the 9th Section, it seems probable that the Collector of Cuddapah would not be able, without considerable delay, to furnish accurate information as to the probable average value per acre of the lands required, and even were this average value ascertained, the actual value of the excessive areas shown in the land plans of the section would depend upon their situation, *i. e.*, whether in waste, or in dry or wet cultivation. Such being the case, I beg to subjoin such information as I have found to be immediately available from the records of this Office and that of the Consulting Engineer for Railways.

2. I find that the average cost of 502 acres taken up for the North-West Line

• Jummulmadugu.

of Railway beyond Cuddapah, and part of which lies in the same talook* as a portion of the 9th Section of the

Company's Canal, was at the rate of Rupees 35 an acre. Similarly, the cost of 258 acres, purchased for the 8th Section of the canal, averaged Rupees 16-12-6 an acre.

Proceedings Madras Government, No. 1,599, 10th June 1865.

3. As stated in paragraph 3 of my letter No. 36, of the 21st instant, the probable excessive area included in the plans not yet passed is Acres 107

That included in plans sent on the 21st May 1867

to the Collector of Cuddapah... .. „ 29

Do. do. do. of Kurnool may, by adopting

the same proportion, be assumed to be ... „ 31

Total Acres... 167

and, with reference to the average rates for probably similar lands, it may, I think, be considered that the amount which would have to be paid for the total area entered in the land plans in excess of actual requirements will not exceed Rupees 5,000, or Rupees 30 an acre, and will probably amount to not much more than half this sum.

No. 126. ORDER THEREON, 5th July 1867, No. 1,999.

IRRIGATION, No. 8.

The Consulting Engineer is authorized, under the circumstances, to pass the land plans referred to in his letter of the 21st June 1867, No. 36.

(True Extract.)

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

To the Consulting Engineer for Irrigation and Canal Company.

whether in waste

Consulting Engineer's Office,
Irrigation and Canal Comp.
N^o 37. Madras 28th June 1857.

From,
Captain John Mullins R.E.
Consulting Engineer M 8766

To,
The Secretary to Government,
Department of Public Works.

Sir,
With reference to the Order of
Government of the 27th Decr 1856 N^o 1915,
I have the honor to report, that as no
land has as yet been actually made
over, or reported to this Office as made
over, for the Madras Irrigation and
Canal Company's works in the 9th Section,
it seems probable that the Collector
of Cuddalore would be able, without
considerable delay, to furnish
accurate information as to the probable
average value per acre of the lands
required and even were this average
value ascertained the actual value
of the respective areas shown in the Land
Plans of the Section would depend
upon their situation i.e. whether in waste,

or in dry or wet cultivation. Such being the case, I beg to subjoin such information as I have found to be immediately available from the records of this Office and that of the Consulting Engineer for Railways.

2. I find that the average cost of 502 acres taken up for the North West Line of Railway beyond Buddapah, and part of which lies in the same Salug as a portion of the 9th Section of the Company's Canal, was at the rate of 1 Rupee 35 an acre. Similarly the cost of 258 acres purchased for the 5th Section of the Canal, average 1 Rupee 16-17 an acre. Summularia
P.M. No. 11
15 June 11

3. As stated in para 3 of my letter No. 36 of the 21st Instant, there is probable excess area included in the Plans not yet passed is 107; that included in Plans sent on the

21 May 1867 to the Collector of Buddapah - 29

of Durnool may, by adopting the same proportion be assumed to be

31
Total acres - 167
and, with reference to the average rates

for probably similar lands, it may I think be considered that the amount which would have to be paid for the total area entered in the land Plans in excess of actual requirements will not exceed 1 Rupee 5,000 or 1 Rupee 30 an acre, and with probably a amount to not much more than half this sum.

I have the honor to be,
Sir,

Your Most Obedient Servant
Wm. Luntin Captain R.E.
Consulting Engineer M.S.E.C.
