in the Fort, prepared at the request of the Officer Commanding the Division.

2. The Barrack Master in requesting the preparation of the estimate states, that he finds the heat reflected from the rampart wall most distressing, and the Surgeon of the regiment reports that the protection is necessary for the health of the troops, as the heat is so great “that diseases of a congestive nature are apt to be induced by exposing the men to the present high temperature.”

3. I believe that the budget allotment for the reserve is exhausted, and the minor work grant is also all appropriated, but I submit the estimate on account of its urgency. The Commissariat Department might be able to furnish the awning required, and to frame it to the rampart wall.

Referred to the Military Department, with reference to the suggestion in paragraph 3. No funds are at present available in the Public Works Department.
