*Proceedings of the Madras Government, Public Works Department,
12th September 1867.*

No. 261. Read the following letter from the Superintending Engineer, 2nd Division, to the Secretary to Government, Department Public Works, dated Camp at Guntoor, 26th August 1867, No. 77:—

- * 1 Plan.
- 1 Survey.
- 1 Detailed Estimate.
- 1 Abstract Estimate, Rupees 1,050.

1. I have the honor to forward plans and estimates, as per margin,* for placing teak-wood shutters and posts to a bridge by which the Venkatagerry

river passes the Trunk Road No. VI in the 86th mile.

2. You will notice, by the survey that accompanies, that the Pumbali channel takes off from the Venkatagerry river, at a short distance from the Trunk Road. To draw the water into it, a bund has been thrown across the river, which has a very dangerous effect during freshes, as it throws the whole water down the Pumbali channel, causing breaches in many places, and seriously hazarding the safety of the road. A considerable yearly expenditure occurs in filling these breaches.

3. The Venkatagerry river is the one which is so liable to heavy floods near Gudur, and for the escape of the spill of which enormous road-dams were lately constructed. By the present arrangement, one of the chief bridges at A, by which it passes the road, becomes comparatively useless.

4. As the Pumbali cultivation is only carried on in December, January, and February, after the heavy freshes have passed, I propose that movable iron posts and planks be placed under the bridge, which will be put into position in the month of December of each year, and serve to dam the water back upon the Pumbali channel. They will be yearly removed before the river rises.

5. If Government sanction the work, I would suggest that the money required be taken from the Reserve allotment of Rupees 25,260, granted in G. O. No. 1,185, dated 17th April 1867, for the Dondapaud tank, &c.

No. 262. ORDER THEREON, 12th September 1867, No. 2,805.

IRRIGATION, No. 10.

The estimate of Rupees 1,050 submitted with this letter is sanctioned.

Funds for the execution of the work will be provided by transfer from the allotment for the Dondapaud tank, as proposed by the Superintending Engineer.

(True Extract.)

(Signed) CHARLES A. ORR, Colonel, R. E.,
Secretary to Government.

To the Superintending Engineer, 2nd Division, with Detailed Estimate.

1 Abstract
Estimate
Rs. 10,50.

Sir I have the honor to forward
Plans and Estimates as per margin for
placing teak wood shutters & posts to a
bridge by which the Venkataswamy River
passes the Trunk Road No II in the 86th
Mile.

2. You will notice by the survey that
accompanies, that the Pumbali Channel
takes off from the Venkataswamy River
at a short distance from the Trunk Road.
To draw the water into it, a bund has been
thrown across the River which has a very
dangerous effect during freshes, as it
throws the whole water down the Pumbali
Channel causing breaches in many places
and seriously hazarding the safety of the
Road. A considerable yearly expenditure

Means in filling the breaches.

3. The Venkataswamy River is the one which is so liable to heavy floods near Gudivar, and for the escape of the spill of which enormous road dams were lately constructed. By the present arrangement one of the Chief ^{at A} Dringes by which it passes the Road becomes comparatively useless.

4. As the Pumbali Cultivation is only carried on in December, January, and February after the heavy freshes have passed, I propose, that moveable iron posts and planks be placed under the Dringe which will be put into position in the month of December of each year and serve to ~~stop~~^{dam} the water back upon the Pumbali Channel. They will be yearly removed before the river rises.

5. If Government sanction the work, I would suggest that the money required be taken from the reserve allotments of Rs 25,260 granted in G.O. No 1185 of 17th April 1865 for the Dondapudi Tanks &c.

I have the honor to be
Yours most Obedt Servt
