G.O. No. 3093 Press —Mis.—

95-96

Dated 5-10 1867.

Not to be folded or roughly handled

Proceedings of the Madras Government, Public Works Department, 5th October 1867.

No. 95. Read the following letter from the Acting Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 23rd September 1867, No. 3,084:—

1. I have the honor to forward, with reference to G. O. No. 1,453, dated 14th May 1867, a plan and estimate, amounting to Rupees 1,030, for laying on water to the Medical College, Madras, from the main pipe which supplies the General Hospital, and for distributing the supply generally throughout the building.

1 Plan.
1 Estimate.
1 Specification.

2. The estimated cost amounts to Rupees 2,072, but the value of the pipes, to be cast at the Mint, which comes to Rupees 1,042-9-0, has been deducted from this sum. The wrought-iron pipes for the distribution of the water have been entered in the Indent on the Home Government, under the authority as per margin.

G. O. No. 1,413, dated 9th May 1867.

3. Provision has been made for putting up a stand-pipe in the College rear verandah for drinking purposes, and for conducting the water to the Practical Pharmacy and Laboratory rooms, in the north-east corner of which department of the building a galvanized iron roof and small glass sky-light will be built, as a covering to the small lavatory which it is proposed to place there. The estimate also allows for laying on water to the upper story to supply the sink required by the Chemical Examiner, but unless the supply is pumped up, this portion of the distribution will await the elaboration of a general scheme for the supply of the town of Madras. The plans have been prepared in communication with the Principal of the College.

No. 96. ORDER THEREON, 5th October 1867, No. 3,093.

MILITARY WORKS, No. 4.

Sanctioned. The Superintending Engineer will apply for funds after the 1st April next, when a grant will be made from the Reserve.
