*Proceedings of the Madras Government, Public Works Department,
24th October 1867.*

No. 533. Read the following letter from the Superintending Engineer, 6th Division, to the Secretary to Government, Department Public Works, dated Tanjore, 8th October 1867, No. 991 :—

1. With reference to G. O. No. 2,050, dated 9th July, sanctioning the demolition of the Vellay Calingum Granary at Trichinopoly, I have the honor to forward an estimate of Rupees 1,927, and to request that the amount may be provided from the Reserve under Military, as there are no funds available for the work from the allotments of 1867-68 for Military Works, either under the head of "Minor New Works" or of "Repairs."

Rupees 1,926-11-0.

2. A memorandum showing the probable sum which will be realized from the sale of the materials is enclosed, the amount when realized will be paid* into the treasury.

* G. O. 2,827, 25th September 1865.

3. On the receipt of the estimate, I pointed out to the Executive Engineer that a large portion of roughly cut stone and rubble was included in the item of debris to be removed; that about 33 per cent. of the brick-work was to be removed by the department as unsaleable; that cubes might perhaps be cut from some portions of the building; that a very small sum was entered as that to be realized for the stone pillars; and that a large sum was provided for scaffolding and sundries.

4. In his reply the Executive Engineer points out that the demand for materials of this nature is capricious; that the Municipality will not use the debris on the roads though, as I have informed him since, it makes a very good substratum though not a good surface material; that there are no groyne works sufficiently near to admit of the cubes being used in them; that the stone pillars and other materials may fetch more than is estimated; that the great object is to remove the building at once, and that the building is of such a nature as to render it necessary to provide very strong scaffolding, and he deprecates any alteration in the estimate or in the rates. I therefore forward the estimate intact, and request that Government will pass it; and I hope that a somewhat larger sum than is anticipated will be realized from the sale of the materials.

No. 534. ORDER THEREON, 24th October 1867, No. 3,308.

MILITARY WORKS, No. 40.

Before passing orders on the estimate for the demolition of the Vellay Calingum, the Government request the Magistrate of Trichinopoly to be good enough to report, in communication, with the Garrison Surgeon, whether in the event of measures being taken for checking the use of the building as a latrine, there would be any advantage gained by its removal, and, if not, whether it would not be advisable to dispose of the property, as a whole, for occupation as a private place of residence.

From, The Superintending Engineer
6th Division Bangalore

To, The Secretary to Government,
in the Department of Public Works

Sir,
With reference to G. O. No. 2055
dated 9th July, sanctioning the demolition
of the Vallacalingum Granary at
Tichinopoly, I have the honor to forward
an Estimate of Papers 1927 and
to request that the amount may be
provided from the Reserve under Military
as there are no funds available for
the work from the allotment of 1867-68
for Military Works either under the head
of Minor & two works or of Repair.

2. A Memo showing the pro-
bable sum which will be realized from
the sale of the materials is enclosed -
the amount when realized will be paid
into the Treasury.

Estimate for Demolition
of Vallacalingum Granary
at Tichinopoly
under the head of
Minor & two works
under Military Works

21:99L

Letter No. 21:99L dated
8th October 1867 - From
the Supt. Engrs. Office
to the Secy to Govt.
in the Department of Public Works

On the receipt of the Estimate I pointed out to the Executive Engineer that a large portion of roughly cut stone and rubble was included in the item of debris to be removed, - that about 33 per Cent of the Brick work was to be removed by the Department as unsaleable, that cubes might perhaps be cut from some portions of the Building, that a very small sum was entered as that to be realized for the Stone Pillars and that a large sum was provided for scaffolding and sundries. -

In his reply the Executive Engineer points out that the demand for materials of this nature is capricious, that the Municipality will not use the debris on the Roads, though as I have informed him since it makes a very good sub. stratum though not a good surface material - that there are no Groynes works sufficiently near to admit of the cubes being used in them - that the stone Pillars and other materials may fetch more than is estimated - that the great object is to remove the Building at once and that the Building is of such a nature as to render

it necessary to provide very strong scaffolding and he deprecates any alteration in the Estimate or in the rates, I therefore forward the Estimate intact and request that Government will pass it; and I hope that a somewhat larger sum than is anticipated will be realized from the sale of the materials.

I have the honor to be,
Sir,

Your Most Obedient Servant,
W. F. Gale Captain R. E.
Supt. Engineer to Division

Read the following

From the Sup^y Equiar^t & B^y (Here enter No. 991 dated 8th October 1867)

Before passing orders on the Estimate for the demolition of the Vel-
lay Calingum, the Govern-
ment request the Magis-
trate of Trichinopoly to be
good enough to report,
in communication with
the Garrison Surgeon,
whether in the event of
measures being taken
for checking the use of
the building as a latrine
there would be any
advantage

Between what said
the Court of Municipal Affairs
than repaired the nature of
foodstuffs -

I am perfectly certain
whether such a strong
substantiated feeling as
this is, might and he were
about to pass and report
of a whole - thus being
of some further for and
after certain education
are a place of residence -
I hope he yet shows
that will be the benefit
of a national, if it were
on a Latin method.
I should wish the way to
be shown and the method
on some will the method
of the Dr. Rankin's
independent on opinion.
At present all are
known about it in Town.
