*Proceedings of the Madras Government, Public Works Department,
7th December 1867.*

No. 146. Read the following letter from the Acting Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 26th November 1867, No. 4,093 :—

1 Plan.
1 Estimate.
1 Report.

1. I have the honor to enclose for the orders of Government a plan and estimate, amounting to Rupees 3,400, for erecting a boundary wall and

railing on the north and east faces of the Presidency College property, Chepauk.

2. An iron railing of the pattern hitherto in use has, as you are aware, been in course of erection, under the order marginally entered, on the sea face of

G. O. No. 2,074, dated 11th July 1867. Chepauk and the Government House compound, from the corner of Pycroft's road to the new iron bridge across the Cooum river, but as the portion of it fronting the College would not well harmonize with the building under erection, the Executive Engineer has submitted a design and estimate more in keeping with the architecture, whilst, in the meanwhile, that section of the work has been suspended pending the wishes of Government.

3. Mr. Chisholm proposes to enclose the south as well as the east face of the property, which is desirable, and he also proposes to have the ornamental iron rails

Rupees 5,950.
" 2,550*
3,400

and gates cast at the Mint, the supposed cost* of which, therefore, I have deducted from the estimate.

4. The work provides for three pairs of gates, two on the east and one on the south side. The rate for brick masonry above foundation is very high, and far above that usually allowed, but the Executive Engineer accounts for this by the wall being one brick thick, requiring first class material and workmanship. The other rates are similar to those in force at the College works. The basement will be of stone and brick-in-chunam, and the railings will be erected between pillars of brick capped with stone.

Exclusive of Rupees 18,845 for the rails. 5. I would propose to carry out the work from the estimate of Rupees 5,355 for the other railing, sanctioned in the G. O. above quoted, the provision of funds being provided for hereafter.

No. 147. ORDER THEREON, 7th December 1867, No. 3,812.

CIVIL WORKS, No. 26.

The estimate of Rupees 3,400, submitted with this letter, for the erection of a boundary wall and railing on

the southern and eastern sides of the grounds of the Presidency College at Chepauk is sanctioned.

2. The Government approve of the proposal contained in paragraph 5.

(True Extract.)

Superintending Engineers Office
4th Division Madras.
26 November 1867.

N^o 4093

From

Lieutenant Colonel J. P. Dean R. E.
Acting Superintending Engineer of the
4th Division

To

Colonel C. A. Orr R. E.
Secretary to Government P. W. D.

Sir,

I have the honor to enclose for the
Orders of Government, a plan and estimate
amounting to Rupees 3400 for erecting a boundary
wall and Railing on the north and east faces
of the Presidency College property, Chepauk.

2. An iron railing of the pattern
hitherto in use has, as you are aware, been
in course of erection, under the order margin
entered, on the sea face of Chepauk
and the Government House compound,
from the corner of Pycroft's road to the
new iron bridge across the Coorn River,
but as the portion of it fronting the
College would not well harmonize with
the

the building under erection, the Executive Engineer has submitted a design and estimate more in keeping with the architecture whilst, in the mean while, that section of the work has been suspended pending the wishes of Government.

3. Mr. Chisholm proposes to enclose the south as well as the east face of the property, which is desirable, and he also proposes to have the ornamental iron rails and gates cast at the Mint, the supposed cost of which, therefore, I have deducted from the estimate.

Rs. 5750
Rs. 2550
3400

4. The work provides for three pairs of gates, two on the east and one on the south side. The rate for brick masonry above foundation is very high, and far above that usually allowed, but the Executive Engineer accounts for this by the wall being one brick thick, requiring first class material and workmanship. The other rates are similar to those in force at the College works. The basement will be of stone and brick in Chinnam, and the railings will be erected between pillars of brick capped with stone.

Exclusive of
Rupees 18845
for the rails

5. I would propose to carry out the work from the Estimate of Rupees 5355 for the other Railing, sanctioned in the G. O. above quoted, the provision of funds being provided for hereafter.

I have the honor to be

Sir

Your Most Obedient Servant
