DEPARTMENT

GO. No.	Page
	118
Dated	12/11/50

Not to be folded or roughly handled

Fort Saint George, Public Works Consultation of 30th March 1858.

No. 19. Read the following letter from Colonel C. E. FABER, Chief Engineer; to H. FORBES, Esq., Acting Secretary to Government, dated 9th March 1858, No. 7959.

SIR,

I have the honor to forward, for submission to Government, a Plan and Estimate for enclosing from the public thoroughfare, the Canteen of the Royal Artillery at Bangalore, and opening communication between that building and the Barracks, at a total cost of Rupees (770) seven hundred and seventy.

No. 16 dated 14th January 1858. 2. The recommendation of this work proceeded from Lieutenant General Beresford* who states that it is very objectionable that the Canteen should be "open to all persons," and I beg to solicit early sanction to the Estimate.

Letter from Colonel C. J. GREEN, Chief Engineer, Mysore; to Colonel C. E. FABER, Chief Engineer, Fort St. George, dated Bangalore, 26th February 1858, No. 2292.

SIR,

I have the honor to forward herewith a Plan and Estimate amounting to Rupees (770) seven hundred and seventy, of the expense of enclosing the Canteen to the Royal Artillery Barracks at Bangalore and of knocking down portions of the present Barrack wall, which have been prepared in the correspondence of which the following is copy, and to which early sanction is solicited.

P. S.—An Estimate in reference to the first 4 paras. of my letter No. 1933 (copy annexed) will be forwarded hereafter.

(Signed) C. J. GREEN,
Chief Engineer.

Letter from Colonel C. J. GREEN, Chief Engineer, Mysore; to the Acting Superintending Engineer, Bangalore, dated 15th January 1858, No. 1933.

SIR,

I have the honor to annex copy of a letter from the Officer Commanding the Mysore Division and request the favor of your submitting an Estimate for applying Earth oil and Arsenical soap to the Saddle racks and Shelves in the Dragoon Barracks.

2. The mode in which these applications should in my judgment be made is as follows. To all the wood in contact with the wall and extending 3 inches therefrom, a coat of Earth oil to the rest of the wood work, a wash made of Arsenical soap. The Shelves will only require the Arsenical soap underneath them.

3. The Earth oil can, I believe, be obtained from the Arsenal on Indent, and in the first instance I would suggest you should obtain a gallon on emergency on payment and on seeing how far that will go, it will be easy to calculate how much more would be required for all the rest of the Saddle, Pegs, Shelves, &c.

4. Arsenical soap is made by pounding arsenic to a powder and bruising up cakes of country soap, then mixing the whole together in water like a white wash, stirring up the composition well every time the brush is dipped into it. Ten Rupees worth of each would perhaps be sufficient for the whole of the Barracks.

5. You will also be good enough to make a Plan and Estimate for enclosing the Foot Artillery Canteen by an extension of the Barrack wall on the simplest and easiest plan which is practicable and which the relative situation of the buildings will admit of.

Fort Saint George, Public Works Consultation of 30th March 1858.

Letter from Lieutenant General M. BERESFORD, Commanding Mysore Division; to Colonel C. J. GREEN, Chief Engineer, Mysore, dated Bangalore, 14th January 1858, No. 16.

SIR,

May I request your attention to a complaint made that the white-ants are injuring the Saddlery of the King's Dragoon Guards in their Barracks, and that you will adopt some preventive measure.

I wish also to ask your inspection of the position of the Canteen for the Company of Foot Artillery? That Building stands separate from all others, and open to all persons, such condition leads to much irregularity. Indeed Major Burgoyne shut it up to prevent the irregularities going on in it. The Commanding Officer of the Company of Royal Artillery has the same policy and greatly desires to have it enclosed. I so fully concur in his views, that I would be glad you inspected it, with a view to constructing the necessary enclosure, which it appeared to me can be easily effected; and afterwards by throwing down the wall between it and the Barracks, the latter would be improved by the increased admission of air.

No. 20.

ORDER THEREON, No. 536; dated 25th March 1858.

Referred to the Military Department for consideration.

(Signed) H. FORBES,
Acting Secretary to Government.

N^o 1933.

To The Acting Superintending Engineer
Bangalore.

Sir,

I have the honor to receive copy of a letter from the Officer Commanding the Mysore Division and request the favor of your submitting an Estimate for applying earth oil and arsenical soap to the saddle racks and shelves in the Dragoon Barracks.

2 The mode in which these applications should in any judgment be made is as follows. Pull the woods in contact with the wall and extending 3 inches therefore, a coat of earth oil to the rest of the wood work a wash made of arsenical soap. The shelves will only require the arsenical soap underneath them.

3 The earth oil can, I believe be obtained from the Arsenal or Chindur, and in the first instance I would suggest you should obtain a gallon on emergency on payment and on seeing how far that will go, it will be easy to calculate how much more would be required for all the rest of the saddle racks shelves &c.

Arsonial

4. A chemical soap is made by
pounding arsenic to a powder and bruising up cakes
of country soap then mixing the whole together in
water like a white wash stirring up the composition
well every time the brush is dipped into it. Ten Rupees
worth of each would perhaps be sufficient for the whole
of the Barracks.

3. You will also be good enough
to make a plan and estimate for enclosing the Fort
Artillery Bunkers by an extension of the Barrack wall
on the simplest and easiest plan which is practicable
and which the relative situation of the buildings will
dictate of.
