1. With reference to the list of works for which estimates are awaited, which accompanied the G. O., No. 3,950, dated 20th December 1867, I have the honor to submit for sanction sixteen plans and estimates as per margin, for constructing regulating sluices to the heads of all channels taken off from the Kuam river between Kesaveram and Korattoor Anicuts, in the Trivellore Talook, Madras District.

2. These estimates, amounting in the aggregate to Rupees 10,000, have been approved of by the Collector, who has promised to send in the usual Ayacut particulars shortly.

3. The object in building these works is to prevent a waste of water from the Kuam river into the different tanks while giving each its fair share, and to admit of a larger supply reaching the Chembrambaukum tank in the Poonamallee division of the Sydapat talook.

4. The sluices are to be built of brick-in-chunam, with dressed granite cross and grooved stones to receive the teakwood shutters.

5. These works were the subject of remarks in Mr. Fraser's report on the Chembrambaukum Tank project, and are provided for in the current year's Budget Part II, with an allotment of Rupees 10,000 forming item No. 155.

No. 535. ORDER THEREON, 29th April 1868, No. 1,323.

IRRIGATION, No. 25.

1. The estimates submitted with this letter amounting in the aggregate to Rupees 10,000 are sanctioned for execution from the funds allotted for the works in Part II of the Budget estimate of the current official year.

2. Under the Orders of the 14th November 1867, No. 3,512, these estimates should have been laid before Government through the Chief Engineer for Irrigation.
