G.O. No.	3309	Press
		Mis.
616-617		
Dated	29-10	1868.

Not to be folded or roughly handled

No 992 M.

Government of India.
Public Works Department.
Military Works

To The Secretary to Govt of Madras
in the Public Works Department

Sir, Simla 3rd October 1868.

From Govt of Madras No 820 of 11th March 1868
Public Works Dept. No 391 of 14th April 1868
From Govt of Madras No 1632 of 23rd May 1868

With reference to the correspondence noted
on the margin, I am now directed to
convey the sanction of the Governor General

Two lakhs five
thousand & ten Rupees }

in Council to the estimates received with the first
quoted letter amounting to Rs 2,05,010/ for three blocks
of double storied barracks with the necessary
auxiliary and subsidiary buildings, for a second
Battery of Artillery at St. Thomas' Mount, subject
to the following remarks on a few points of
constructive detail.

2. The plans of the barracks and other
buildings are generally satisfactory.

3. With regard to the arrangement of stairs
in the barracks I am to observe that it has been
ascertained from experience that when the main

stair case is subdivided into three flights, the breadth of the stairs becomes too narrow. The breadth should be at least six feet in the clear, and there should therefore be only two flights, the central one being dispensed with.

4. The Sergeant's stair case should be so arranged that the occupant of the upper quarters need not pass in front of any door of the lower quarters.

5. No roof or flue ventilators are shown in the plan of barracks, but as the details of ventilation have been specially considered by the Madras Sanitary Commissioner, it is presumed that the ventilators have not escaped attention -

6. According to the orders of the Government of India, conveyed in Public Works Department Circular No. 705 of 1865, the height of the lower storey of barracks from floor to under side of girder should be only 16 feet, whereas the section gives a height of 22 feet - the authorised height should be adopted.

The clerestory windows should be protected by sun shades.

8. Cup boards or shelves in recesses should be

be freely given in the day rooms and other
apartments in the lower storey. —

9. The height of Sergeants rooms in the upper storey, should not be less than 16 feet from floor to beam.

10. No sink or furniture are provided for the Cook rooms. - The general plan is however satisfactory but the details should be reconsidered with reference to the standard plan for Bengal that will shortly be issued. -

11. There should be a light door to each compartment in the Privies -

12 The sanction now accorded has been entered as N. 57 M of 1848/49 in the Register of this office.

13. In returning the estimates I am to point out that a specification should have been added to each, and to request that this may be invariably supplied in future.—

Have the honor to be

Sir
Your most obedient servant

Mammalian Colours

Inspector General of the Works

Min. Public Works Department

No. 3399

Proceedings of the Madras Government

Under date the 29th October 1888

Read the following

From The Inspector General
of Military Works. } H. E. No. 992. dt 2/3rd October 1888

Communicated to
the Superintending Engineer
of the 4th Division who
will, in carrying out the
works, attend to the several
suggestions made by the
Government of India.

Adverting to para 5,
Colonel Boileau will report
whether any provision has
been made in the Estimate
for roof or flue ventilators.

The Government observe
that a sum of Rs. 5000
has been allotted for the
works in the Current year's
Budget.
